Re-State The Case By Arnis Luks	1
Faith, Hope and Love - the Greatest of These is Love	2
DNA Altering Vaccines - Chemotherapy & GM	3
Individual Initiative as the Antidote to Tyranny	4

Thought for the Week: “And some things that should not have been forgotten were lost. History became a legend. Legend became myth. And for two and a half thousand years, the ring (*of power-ed*) passed out of all knowledge.” – Galadriel – *Lord of the Rings* - JRR Tolkien.

RE-STATE THE CASE By Arnis Luks

As we enter the New Year, I find it important to re-state a few observable facts: that industrial technology has advanced over the past 270 years in four distinct and identifiable step-changes. While I am describing mainly energy advancements, in parallel similar advancements were occurring in the other industrial arts of: chemistry, engineering, fabrication, planning, design, ergonomics, infrastructure and vocational education to name but a few.

Firstly there was the increment of association: sometimes referred to as the division of labour. The outworking of this phenomena was observed when people came together in factories of some sort working towards a common purpose. This division of labour (dividing functions to improve efficiency) was originally developed for the textile industries in Britain. <https://www.britannica.com/topic/division-of-labour>

The second distinct and observable phenomena was the introduction of steam energy into the industrial processes. Machine power (steam) increased the available energy for production, then only available from wind, water, man and beast, many times over. <https://www.britannica.com/science/steam-power>

The third distinct and observable energy phenomena was the introduction of electrical energy and the internal combustion engine into the industrial processes. Machine power became available anywhere power lines could be laid, or an engine could be installed. Originally electrical power was generated and distributed in close proximity using direct current electricity (DC). With the harnessing of alternating current (AC) utilising the ‘poly-phase rotating magnetic field motor’ developed by Nikola Tesla, caused the existing network of power lines to be hugely optimised across much greater distances. The AC electric motor was smaller, more powerful, and used available energy more efficiently. Then 3-phase power generation, also developed by Nikola Tesla, amplified this significant step change in available manufacturing power wherever power distribution lines were laid.

The fourth distinct and observable energy phenomena was the introduction of advanced control (in the form of automation, programmable logic control (plc), and then robotics with computer control). Advanced control not only optimised production, it caused a significant reduction in the demand for human intervention. Once programmed and optimised the machines not only did the lion’s share of all manufacturing and production but required less and less human intervention.

These four distinct and observable energy step-changes of industrialisation have caused the burden of physical work to be removed from the shoulders of mankind. This is nowhere more apparent than the labour requirements for agriculture having reduced from 85% of the working population in the 1750s, to less than 5% today.

The USA Elections

The aftermath of the USA elections, with climate threats and the COVID-19 lockstep/lockdowns is a direct consequence of unscrupulous people attempting to hide from the public gaze this phenomenon of manufacturing and industrial (material) abundance. The ‘great reset’ is a program to seize the remaining assets of the entire world by a relatively small cadre of international criminal banking and industrial elites to administer for their personal benefit. What our Lord rejected – *all the kingdoms of the world if you would bow down and worship me (satan)*, they have accepted as their own personal property to administer as they see fit.

Debt as the Weapon of Control

The world debt owed to these unscrupulous banksters, which stood late last year at \$277 trillion, represents four years work (as debt) from every living soul on the planet, and is a direct consequence of the fraudulent

money system overlaid across the real economy - the real economy being one of absolute abundance. The money-economy, in particular the money system, is the root of this evil attempt to rule the world.

A point to note is that the release of industrial technology corresponded in real time with the centralising of the money systems of the world. God is undoing their attempted monopoly by the provision of His abundance for all – *seek ye first the Kingdom of God, and His righteousness; and all these things shall be added unto you.*

Any review of our money-economy with the self evident material abundance before us, must result in an entirely different method of distribution based on faith, hope and love - as if all people mattered.

Faith, Hope and Love - the Greatest of These is Love Faith

With the dual threats of a climate catastrophe and COVID-19 comes a direct attack against faith (that things will work according to their nature). The sun will rise and warm the planet, the clouds will bring the rains in season, the crops will grow and produce sufficient, our political and legal systems will uphold the law and protect the peace, our neighbours and acquaintances will continue to be and act as people of integrity and honesty.

Fear is the opposite of faith. Threats of climate catastrophe and COVID-19 both cause the manifestation of fear in an attempt to overcome faith. The COVID marshals (citizen police), lockdowns, mandatory masks and a never-ending depiction of mutant strains of the virus escalate fear to the point there is no safe harbour. Faith overcomes fear to produce the good. Each person must manage their own health requirements as they see fit.

Hope

Hope is an expectation of a certain outcome. Plant a seed and look forward to the development of a plant and perhaps fruit (increment). Make a solemn vow with another person and move forward with conviction that both parties will pursue the good - a man's word is his bond. Maintain an assurance that government programs will be effective and produce the desired outcome for increased freedoms.

Ongoing lockdowns and medical uncertainty destroy hope and produce despair, gloom and depression. Hope answers this call to bring the rains, the sunshine, friendship and trust amongst mankind - social credit.

Love

Love your neighbour as you love yourself – mutual love and co-operation brings us together in our own personal discovery of the abundance of God's provision for all. Treat every human being with the same portion you would want to be treated.

We are able to assess the effectiveness of outcomes by their fruits. Is there an increase in faith, hope and love under the current lockdown and climate scenario, or is it actually the opposite, the planned 'dark winter' to come?

Tian'anmen Square, Pinyin, China 1989

With the recent demonstrations in the USA capital in response to the fraudulent outcome of the presidential election, it's timely to consider the occurrence of the Tian'anmen Square student protests of 1989. There were actually at least two parallel events that occurred that day. The first event presented by the MSM depicted student protests against the dictatorial communist regime, with a single protester defying an army tank causing the driver of the tank to attempt to manoeuvre around the protester. This phenomena was recorded by the MSM for the public consumption of the West. Most of the players (actors) were Communist Party members. (Perestroika being another staged event for public consumption).

The second Tian'anmen Square event which was not recorded by the MSM but surfaced at a later time, was of a spontaneous gathering of people outside Tian'anmen Square who believed the first event inside the square to be a bona fide movement by the people towards freedom. The dictatorial communist regime summarily executed those people on the spot.

This did not surface for public consumption as it would have painted an entirely different picture of what actually occurred that day inside and outside Tian'anmen Square.

USA Capitol

In regard to the events in Washington DC, the USA capitol, I would recommend further consideration and investigation is required before coming to any final conclusions. The observable facts across the entire election cycle are that many Republican and Democrat politicians at the local, state and federal levels, the higher courts, civil and community leaders and the MSM have capitulated to the money power. Trump, whether a good man or no, and whether he was just playing the game to fool the public or no, recognised the writing on the wall acted accordingly. The end result is a significant demoralisation of the freedom movements within USA, with much work to rebuild these movements to regain the initiative after this event. The Yellow Vests in France have now been campaigning for more than a year.

Sidney Powell

US Attorney Sidney Powell is being counter-sued by a reinvigorated Dominion Voting Systems. With the highest courts of USA having just demonstrated they will not uphold the Constitution and Common Law of the land, but rather yield to pressure from the MSM and the money power, and with the demise of Trump and installation in the USA of a communist inspired administration, Dominion Voting Systems are attempting to turn the legal tables on Sidney Powell and her effort to prove the fraud of the recent elections. The higher courts have failed the American people badly. Sidney Powell's book '*Licensed to Lie*' paints this very picture of legal and judicial corruption and 'lawfare' we are now witnessing. We wish her well in her endeavours to enforce the common law, uphold the USA constitution

and re-establish election integrity.

The Hidden Hand Behind Events

I have been recently reading “*Secret Societies and Subversive Movements*” by Nesta Webster. Her important work is invaluable should you wish to understand and decipher the events of our time. It doesn't matter what organisation you consider or belong to, elements within any structure can steer policy direction away from the good. The conflicting elements within political parties, all struggling for supremacy, appear to cause entirely different policy direction. On reflection you will find the policy outcome is nearly the same – totalitarianism.

National Cabinet is Unconstitutional

In Australia the National Cabinet, headed by our Prime Minister and all Premiers, is a cross-party cross-state gathering (of no constitutional validity) that is driving a consistent policy towards totalitarianism.

<https://quadrant.org.au/?s=augusto+zimmerman>

Debt

Personal and public debt levels are becoming more and more irredeemable with no relief in sight – debt being the tool of the manipulators of the money-economy to enslave the entire world. This is causing widespread financial and economic destruction of our governments' tax base and especially the middle class who cannot work their way out of this imposition. Who does this benefit? - the custodians of finance – the money power of course.

DNA Altering Vaccines - Chemotherapy & GM

The threat of mandatory multiple vaccinations for a non-specific and mutating mRNA virus of minimal lethality is turning our existing world order upside down. The real threat is the extended lockdowns (solitary confinement causing economic collapse and personal hardship) and DNA modifying vaccines (chemo & Genetic Modification) being proposed. The beneficiaries of this malfeasance are the proposers of this tyrannical policy. It is a marketing campaign to ensure compliance of their products – masks, tests and vaccines, and observance of their directions towards total control. Minimal hospital facilities are currently required and very few fatalities are recorded as a direct result of COVID-19 being the principal cause of death, and not from another existing pre-morbidity condition.

<https://www.health.gov.au/news/health-alerts/novel-coronavirus-2019-ncov-health-alert/coronavirus-covid-19-current-situation-and-case-numbers>

The panic buying that has occurred prior to each lockdown is an indication of insufficiency of ‘faith’ in the existing system. We are losing more and more faith each time a lockdown occurs. During the French Revolution it was not an actual shortage of food that was the main problem, it was the ‘fear of a shortage’ that caused increased levels of anxiety. The people behind that revolution were playing this very same card of fear on the public of that day. (Read Nesta Webster's four books on this subject from our online library)

Those books will reinforce the view that the French Revolution was the prelude of this greater World Revolution we are currently experiencing.

Nesta Webster's books do highlight the real managers and manipulators of the revolution are hidden from public view. Bill Gates and Anthony Fauci are only frontispieces for the hidden money power. The UN, World Bank and IMF all do the bidding of this same power. Scientists, medical institutions, mathematicians and economists all promoting Technocracy (ruled by elite) are simply hired guns to promote the same policy, always towards totalitarianism.

The Communist Bloc

The establishment of the Soviet Union and China as communist slave-states was not accidental, but part of this greater plan. History records the direct financial, economic and military support directed from the west to establish and continue to support the Soviet Union and later communist China during their formative years. Significant advanced space technology is currently being transferred with the joint space-station projects. Repeated reports of direct transfer of technology towards the communist block from the west, as catalogued over many years by Prof Antony C. Sutton, surface regularly within the MSM. <https://alor.org/Storage/navigation/Library6.htm>

This is apart from the historical subterfuge of highly secret nuclear and rocket technology. Agents of both communist and capitalist societies have worked collaboratively for this to occur. Alger Hiss was working unhindered and actively supported (during the American Roosevelt administration) to establish the communist controlled United Nations as another example. The same *modus operandi* is surfacing again with different branches of the USA political administration, intelligence and deep state (finance and military industrial complex) working openly together with the CCP Communist Party of China - as can be observed with the fraudulent voting systems to circumvent the outcome of the USA presidential election just held. These same hidden, but sometimes open conspirators are also within the Catholic church, both in the free world and within the Communist bloc, being reported about here: https://www.theepochtimes.com/catholic-church-is-infiltrated-by-globalists-archbishop-carlo-maria-vigano_3649152.html

Both communism and capitalism openly support totalitarianism as their end goal. On the other hand, free enterprise and responsible government supports individual initiative and the division of political power, capital and labour. Little surprise that the communist Chinese called their state surveillance and control system ‘social credit’ being cognitive dissonance, a perversion of the meaning of words. Chinese social credit is a system of state imposed rewards and punishment – discredit.

Douglas Social Credit

Douglas Social Credit is an observable and timely response to this centralising tyranny.

Money and Economic Power Distributed

As a policy of the philosophy of Christianity, DSC places power at the feet of each and every individual, financially with the National Dividend and Consumer Price Discount.

Political Power Distributed

Geoffrey Dobbs elaborated Douglas's proposal further with the recommendation of a Responsible and openly recorded Vote alongside the Veto mechanism for all unacceptable legislation. This places political power at the feet of each individual and makes government policy accountable and transparent. The secret or hidden vote has covered a multitude of sins since its inception.

Free, Moral, Responsible

Freedom and Responsibility are inseparable under the umbrella of Morality. What we are witnessing is an unaccountable administration from both government, industry and also society with the bribe payments of jobkeeper / jobseeker. You cannot expect government and industry to be held to account without the same standard being applied to ourselves.

Sorry Day

Last Friday in Adelaide SA, people held a 'sorry day', for individuals to place flowers and wreaths onto the steps of Parliament House to mark the huge loss of human life through abortion and euthanasia laws enacted within Australia. One stalwart couple were in attendance for the entire day to witness and support the event.

Individual Initiative as the Antidote to Tyranny

Trump has done the freedom movement a good service, in that his demise has demonstrated an important consideration. Any freedom movement, to be effective, must be decentralised and not rely solely on high profile individuals. When those individuals are identified, can be destroyed and the movement emasculated. Over many years of political campaigning, ALOR has developed the VPA handbook for just such decentralised action opportunities here: <https://alor.org/Storage/Library/PDF/VPA%20Handbook.pdf>

Australian League of Rights

The ALOR, formed as a national body in 1946, (as a consequence of the 'Vote No' campaign against the 14 powers referenda by the then Labor Government of 1944), has been exposing this hidden hand of manipulators of the money-economy since it's very establishment. This edition of *On Target* demonstrates 57 years of accurate and uninterrupted reporting and disseminating of the NEWS (since 1965).

The *New Times*, another ALOR journal, goes back to 1935. Our archives are there to be searched and explored to show this same hidden power movement has been in effect and continues to this day.

It is important to ensure the historical record is always there for posterity. I commend you seek out a full copy of the archives from Head Office to be placed onto your own computer under the discipline of desktop search

software for your own personal research opportunities.

I also recommend you avail yourself of the many rare and important books available at our sister website <https://veritasbooks.com.au>

The Way Forward is Firstly The Way Back

We cannot undo what is occurring politically if we do not understand the many effective lessons of history, generally worked through by past generations and revealed in the study of the evolution of the common law, civics and constitutionalism based originally on the trials of the church well anchored within the Christian Gospels.

Training

It is most important to develop your thinking to be effective in the political realm. A Social Credit training course will be held in **Adelaide, SA 20th February 2021**. This course will help to establish a firm foundation to move forward. **Please mark the date in your diary.**

Personal attendance, even across the internet, is really important to view the presentation and follow up questions to consolidate this opportunity for learning. Further attendance details will be confirmed closer to the day. The training will be recorded and available later through DVDs, USBs and the internet, so all will have an opportunity to train.

Individual Initiative is the Antidote to Tyranny

BEQUESTS

From time to time people wish to leave a bequest to further the ongoing work of the League. This helps to ensure our most important message continues to go out.

Our staff continue to build onto the good work of the past towards a better future.

Take your time to explore a revamped and updated website with the main Library now separated into 5 distinct areas. Our Journals continue to disseminate the news and provide a timely response to an ailing world.

The historical Mayo Tape Library is steadily being entered into the Podcast Library to ensure the speeches of the past can be again brought back to life.

Should you wish to direct a bequest to the League, please direct towards: **"TALOR Pty Ltd,
c/o The Australian League of Rights"**

- Ken Grundy National Director

Subscription to On Target \$45.00 p.a.

NewTimes Survey \$30.00 p.a.

Donations can be performed by direct bank transfer:
