The International Idea By Arnis Luks	1
Debt As The Weapon	2
Invest in Yourself	3
Target and Adelaide Rally Against Forced Vaccinations	4

Thought For The Week: Papua and New Guinea have very large areas of sparsely populated land, great forests, huge mineral and ocean resources and much more. The CCP have devised a long-term strategy that will achieve by commercial and industrial settlement what previous empires achieved by conquest.

<https://www.theaustralian.com.au/commentary/the-indigenous-peoples-of-png-will-be-minorities-in-what-was-once-their-country/news-story/f868afb60481d3492c02ec76154d59cc>

THE INTERNATIONAL IDEA By Arnis Luks

Last week's On Target covered the relatively recent lineage of mega-corporations and central banks' power over and above governments and nations; and that the 1688 invasion of England was to prevent any lasting cohesion between English Government (King), the English people and the historical Christian church. Note, I referred to the church in Rome not the Church of Rome, just as you may think of the Church in England as not necessarily the same as the Church of England. These distinctions help to explain the inordinate influence over the pulpit, the podium and the platform.

One aspect not covered in that chronological article was the Opium Wars (1839-42) exercised against China mostly by the British East India Company. The leaders in China attempted to stop the scourge of that debilitating drug on their communities and "gunboat diplomacy" was exercised until the administration yielded. The similarities of the scourge of then opium, is now reported of methamphetamines causing generational losses impervious to any rehabilitation attempt. This is deliberate policy to de-construct us as a people, not just the poor, but reasonably well-to-do families losing their entire asset-base to this insidious addiction of destruction.

<https://www.theaustralian.com.au/inquirer/asias-el-chapo-tsechi-lap-and-the-fall-of-the-company-man/news-story/5bdbf50df4ef1fdd9b740007a9ac0972>

LSD was developed by the CIA for their purposes. The Soviets used the illicit drug trade to finance their expansionist policies while weakening the resolve of the targeted people. Little wonder that the very same "gunboat diplomacy" exercised hundreds of years ago, surfaces while we witness an unannounced arrival of three warships from a foreign power into the main harbour of Australia to collect baby food - yea right.

Australia has been internationalised by our politicians, leaders of platform and pulpit, and bureaucrats, and had its industry deconstructed, being the policy of these mega-corporations. Media gives little if any attention as they have also been internationalised by all political parties. Note especially there is not a word from the opposition nor the UNIONS. These same issues are recorded in past On Targets from last year and 1993 that is worth a visit if you have internet access.

Food Security

Government figures show us as a significant exporter of food, but when the statistics are challenged back by accountants we find that we are barely able to feed ourselves. COVID-19 lockdown has left food crops unharvested, while never-ending water restrictions on our growers and inordinate energy prices constrict industry. This is a deliberate undermining of our resilience and self-reliance in order to compel us into a centralised "great reset" mega-government.

<https://www.michaelsmithnews.com/2021/01/tanya-plibersek-on-climate-were-losing-the-great-barrier-reef-kakadu-and-the-ability-to-feed-ourselv.html?cid=6a0177444b0c2e970d0263e98c275d200b#comment-6a0177444b0c2e970d0263e98c275d200b> and
https://www.pir.sa.gov.au/_data/assets/pdf_file/0006/339225/Independent_Review_of_the_South_Australian_GM_Food_Crop_Moratorium.pdf
 2/11/2020

The introduction of all GM crops into South Australia, endorsed and supported by politicians from all political parties and in defiance of 11 councils objecting the mantra of economic benefit, compounds our precarious food

security position. Little wonder within hours of the GM announcement the South Australian State Government announced huge new budgetary projects financed by an expansion of debt to the International Monetary Fund and such like. It could not have been more obvious that lifting of the GM bans was conditional of the new loan. 37% of winegrowers in the Fleurieu Peninsular are either organic or biodynamic to the tune of \$20M now at risk.

Multifunction Polis

The Australian Submarine Corporation is only party of an entire International Defence Project going on to the north of Adelaide, SA. In light of the supposedly shelved Multifunction Polis for Adelaide by Federal Labor governments, we need to also consider International University cities such as Melbourne. The latest proposal of a new city 200kms to the north of Australia on the shores of New Guinea is simply a continuation of the internationalist agenda. Nothing has changed since VOC.

Debt As The Weapon

The 2010 debt crisis caused the very real assets of Greece to be confiscated into this mega-government's hands. Australians are being imprisoned in their own borders with limited / restricted access to the lifeblood of the economy, 'money', as was Greece. I am not at all surprised with surrounding by a razor-wire fence around the capitol buildings in USA. This is standard operating procedure for repossession of an asset.

Only A Few Remain Faithful To The Last

Jacinta Nampijinpa Price is deputy mayor of Alice Springs and Director of the Indigenous research program at the Centre for Independent Studies. She wrote recently of the significant problems experienced by rural Aboriginals. Pornography, illicit drugs and alcohol fuel the violent destruction of her people. Several outstanding communities have chosen to ban all these in order to stand firm against this imported societal destruction.

Fabricated narratives of their culture are plastered across MSM outlets as fact. Keith Windschuttle stands firm and almost alone against this false narrative. Prof Alan Frost faithfully recorded the wonderful exploits of Captain James Cook and the First Fleet arriving in Botany Bay. Prof Peter Ridd and Dr Jennifer Marohasy stand apart from the crowd over the health of the Great

Barrier Reef. They all are the 1 in 10,000, the salt of the earth that has not lost its savour.

The events of Australia Day, regularly denigrating all our achievements as a people are designed to break the morale of each person. As is gender identity, traditional views of marriage, class warfare especially feminism, all methods to undermine our faith in the basic unit of society, the family. These are all attacks on our culture, a levelling down of every unique individual into an amalgam for a world society controlled by these mega-corporations. It is a fight to the death. Manoeuvring around the periphery won't achieve any lasting result.

The Crowd

As in the days of King James II so it is today. The middle and upper-class are jostling for the few precarious positions to serve their new masters. Our political representatives, in my living memory going back at least before Whitlam, have deliberately steered Australia towards internationalism. I have witnessed perfectly intelligent people of a mechanical background that refused to acknowledge any anomaly with the three multi-storey buildings that collapsed in their own footprint on 9/11. Facts will not resolve the discrepancy between a concrete and steel multi-storey construction turning into pulverised clouds of dust in mid-air as the buildings collapsed at free-fall speed to the ground. Nor that the engineering standards and design for multi-storey steel and concrete construction have not been altered one iota since this event. The reality is, if their view is to change there will be an immediate lifestyle impact. It is a tough call for anyone and everyone to make.

Our Blog

James Reed has written in our blogs 100 times, of the corruption within our institutions presenting entirely false narratives of not only our history and culture, but since 1986, when former New South Wales Premier Neville Wran was placed in a position of significant influence over the Bureau of Meteorology and CSIRO, also science. In 1863, the monopolist John D Rockefeller when only 24 years old, invested heavily in China's science, medicine and a higher education industries. I found these articles of him most informative:

<https://asiafoundation.org/2011/10/12/the-oil-princes-legacy-rockefeller-philanthropy-in-china/>

Reliable Reporting From On Target

Most anyone who does not read our On Targets would be unaware that modern industrial China is an American construct, as was the Soviet Union diligently recorded by Prof Anthony Sutton of Harvard university. As the mega-corporation headquarters of the 1600s Dutch East Indies Company (VOC) moved from Holland to England and then onto America, so these few mega-corporations are progressively moving to China as the new seat of power.

Staged Events To Quieten Dissent

The staged corridor haranguing of Craig Kelly MP of his support for alternative treatments of COVID-19

is using the modern weapon of mass media propaganda rather than 'gunboat diplomacy'. The science of mRNA injections is not substantiated. It is an experimental science of which millions of people are unwittingly involved in this live experiment. That alternative methods to manage your health are not only frowned upon but actively campaigned against demonstrates the inordinate influence these mega-corporations have over our bureaucracy, training institutions and elected officials - all administrators of mega-corporation policy. And that this has been going on for hundreds of years.

The Internationalist

Douglas wrote an excellent essay available here: <https://alor.org/Storage/Library/Douglas%20CH%20-%20The%20International%20Idea.htm> that needs to be read and reread. The mega-corporations were able to establish themselves based on the fraud of the financial system to the point where the indebtedness of nation-states are then forced to hand over their very real assets as collateral.

In Michael Hudson's book "*...and forgive them their debts*", he paints vivid pictures of past civilisations caught in the same debt-trap that eventually caused their collapse. The populations were impoverished to the point they were landless, unable to feed themselves, unable to pay any sort of rent or taxes and so chose slavery rather than death. These are stark words that are quite unsettling, but that is the truth of where we are heading.

Invest in Yourself

I have been placing quite a few internet URLs within the On Target for further research. This is done in the hope that even those who are reluctant to enter into this area of technology, will venture out. Your local library will give you access without charge to the Internet. The On Target is a culmination of the week's research, in conjunction with the broadcast discussions by other Douglas Social Creditors from around the world. We publish without fear or favour, warning about threats to rights and freedom irrespective of the label. The issues experienced locally, are being felt around the world. The solutions are always found at the local level.

Alberta, Canada

I have previously mentioned the dirt poor farmers of Alberta, Canada and how they were able to hold back and circumvent the conditions of poverty imposed on them during the great depression. Yes, there were traitors in their midst, and yes the central federal government under the guidance and financial backing of banking interests were campaigning against them, but they were still able to improve their lot. The regeneration always starts at the local level where the real rubber hits the road.

Introduction to Social Credit No 1

Extract

The battle to regain the ground lost and insist on changes to the mechanisms of society, at present being used to encroach more and more on our freedoms, is before us. The great Russian writer, Alexander

Solzhenitsyn, a prophet for these times, has wisely counselled his own people that the path they need to follow, if they want to find their own way back from the oppression and desolation of the last 100 years, begins from within. It begins with a regeneration of their own spiritual energies and their relationships one with another....

"The strength or weakness of a society depends more on the level of its spiritual life than on its level of industrialisation. Neither a market economy nor even general abundance constitutes the crowning achievement of human life. The purity of social relations is a more fundamental value than the level of abundance."

Solzhenitsyn went on to list the order of priorities for the Russian people - the same order of priorities would apply to the West. The regeneration begins from within. Natural growth and expansion begins from within and so does the regeneration of a nation's soul.

"If a nation's spiritual energies have been exhausted, it will not be saved from collapse by the most perfect government structure or by any industrial development: a tree with a rotten core cannot stand. And that is why the destruction of our souls over three quarters of a century is the most terrifying thing of all."

Bank 'money myth' exploded

It has been exploded so successfully that in these days, 'bank-credit' is an expression in everyday use; it is slowly being recognised by 'the man in the street' that bank-credit is simply one form of money, and that it is created by the banks. It is taken for granted that money can be created on a scale necessary for war, it now needs to be understood it can also be found on the same scale for peace. It is difficult to take one's mind back to the days when the official economists denied that banks created credit, and that the 'laws' of economics were held to be part of the unchangeable laws of the Universe. Officially, economists now advocate a 'managed' economy.

The 1929-30's Banker's 'Great Depression' caused much hardship and poverty. In many cases men were ruined overnight and took their own lives, so that by 1935 there was a growing demand for a rectification of the financial system. At the same time, it became evident to many observers that the system was consciously being used to further centralise power on a world-scale and that those who controlled its operation were not going to relinquish their power.

It is of the utmost importance to grasp this situation. A small group of men, International Financiers, were using the financial system to impose their policy on the world. Major Douglas expressed it thus, "the financial system was the headquarters of this POLICY."

"The love of money" i.e., the preference for money, in terms of personal advancement above all other considerations, "is the root of all kinds of evil."

We were told we could not serve God and this financial system, we had to make a choice if we were to have stability and harmony in our lives, and in our associations.

"Consider the lilies of the field", (the lilies in this case were the wild lilies that grew without Man's efforts) "how they grow; they toil not, neither do they spin" (again Man's efforts). "Wherefore, if God so clothe the grass in the field, which today is, and tomorrow is cast into the oven, shall He not much more clothe you, O ye of little faith!" Matthew 6:28

Why do we have to consider the lilies? In studying the lilies and how they grow we are focussing on the natural order, Natural Law. We are looking at, considering, studying carefully, the complexity of the links between the lilies that God is clothing and the micro-organisms, the worms, the sun's energy, the rain and the soil. We are looking at the complexity of the mutual-benefit-associations working together, associating, to produce the beautiful lilies of the field. Everything within the field has gone into producing the beautiful lilies. In remembering that the field is there for the benefit of each of the lilies (the crowning glories of the field) are we not being shown that the field, the group, the whole, exists for the individuals comprising the field, the group?

Not vice versa!

In studying how they grow we begin to look at the real world - God's world - and His great Creative Power which expresses itself in mutuality, in the positive and complementary behaviour of all living things in relation to each other. This mutuality-in-association enables them to grow and survive. This is a very different world from that built up in our minds by the 'black-magic' of the money power, the religion of Mammon.

Douglas Social Credit

Douglas' observation of the real Social Credit is something inherent in the very fabric of the Universe. However, it must be released! It can be suppressed but it can never be destroyed! Social Crediters view a society, any society, as something partaking of the nature of an organism which could have 'life and life more abundant' to the extent it is God-centred and obedient to His Word or Logos. Therefore, they seek to encourage others to look seriously at this body of knowledge - 'Social Credit'.

Mutual Love And Cooperation

Far from being a piece of sentimentalism, the great Christian Commandment "Love one another" enunciates a fundamental principle for successful co-operation between individuals in society. This 'love' is a dynamic force which can be seen in the 'good fruits' of human association based on the 'right' principles or fundamental truths.

"Again I tell you, if two of you on earth agree (harmonise together) whatever they shall ask, it will come to pass and be done for them by My Father in heaven."

His creative, dynamic force, His love is released for the benefit of those who have gathered together for a particular purpose. The basis of the social philosophy of Social Credit is that the Individual is the all-important unit, and that the only justification for the existence of any organisation - from a football team to a modern Nation-State is that it promotes, in some way, the life and well-being of the Individual. One important fact regarding Social Credit should be of great encouragement. There are 'conscious' Social Crediters who know what it entails and spend their life trying to teach it, and more importantly, putting it into action, because they firmly believe that is the way to go. ***

TARGET & ADELAIDE RALLY

Readers are encouraged to ring the Prime Minister's Dept to protest in the strongest possible terms over the treatment handed to Craig Kelly MP over his support for additional treatments for Covid 19. He is NOT opposed to vaccination but is endorsing findings from two leading professors to use Hydroxychloroquine and/or Ivermectin as well, both of which are used to great success in other countries. From the PM down to the ALP and the media, Mr Kelly has been wrongfully accused of discouraging the job. Ring 02 6277 7111 to reach Parliament House where you can be transferred to the PM's staff. Register your strong support for Mr Kelly and complain about the disgraceful treatment he has received. Give your local MP a call as well. He must be allowed to speak out - this is Australia, not China!

Letters are in order too but a phone call shows your aroused concern. The disgraceful treatment of Mr Kelly will spread to others who might be inclined to speak out on issues unless strong community support for Kelly and others like him can be demonstrated.

Letters to papers in the electorate of Hughes would be a good move too. *ND*

Adelaide Rally

Sat. Feb. 20th a rally against enforced vaccinations. Frome Park from 10.30am and start our peaceful march at 11.15am to land at Parliament House for noon. SAPOL have been informed.
