

Stop terrorism! Stop Immigration!

The accompanying article is designed to take the current public opinion on terrorism to the next stage. It will be done in the correct manner, namely; demanding our political representatives carry out the wishes of their voters. No riots; no violence; just simple democracy in action.

The attitude of Members of Parliament regarding terrorism ranges between doing little or nothing right through to those who hint at supporting a ban on immigration.

By electors contacting their MP, the message will eventually get through to them that failure to obey the voters will mean they will not be returned at the next election.

The contact will give those who are quietly leaning toward banning immigration, the confidence to promote the policy.

Your participation in this campaign is essential. If you see the value in promoting it, please do two things:

1. Print the article and send it to your MP and Senators (especially the cross-benchers) with a brief note stating you agree with the 'stop immigration' policy and request they support it at the Parliamentary level. Send it to them all - don't worry about which party they belong to.
2. Send it to your contacts asking them to act as well and they can send it further too. Start with your email contacts or other social media.

Responsible government grows from responsible voters. It is the voter's responsibility to inform his representatives about the policies he desires. Do not blame the MP's if you have not carried out your duty.
