FOURPENCE WEEKLY

UNMASKING HIGH JEWISH POLICY

Rank and File Jews Exploited

By ERIC D. BUTLER

Recent news from the Middle East throws into stark relief the fact that Jewish influence, exerted through the British, American and Russian Governments, has resulted in the entire Moslem world taking steps to resist the disgraceful partition of Palestine by U.N.O. The Arabs are making it clear that they will resist to the death any further encroachment upon their rights by the Jews.

As we have consistently pointed out, the rank and file of the Jews are merely pawns in a much bigger game. A major part of the game has been to use high pressure propaganda on an international scale to create the impression that the Jews suffered more hardships as a result of the war than any other people.

OUR POLICY

1. The preservation of Australia's sovereignty as a part of the British Empire, and the exposure of all internal and external groups which attack that sovereignty.
2. The preservation and extension of genuine local government.
3. The preservation and strengthening of all Constitutional safeguards for the purpose of protecting fundamental individual rights.
4. The encouragement of all activities designed to bring Governments under more effective control by the electors.
5. The preservation and extension of genuine free, competitive enterprise and private ownership, and opposition to all Monopoly, whether it be "private" or State.
6. The support of a financial policy which will (a) permit free enterprise to make available to all individuals an increasing standard of living and greater leisure for cultural pursuits; (b) result in no further increase in the community's indebtedness and the sound business practice of gradually reducing existing debt.
7. Recognising that the basis of any sound economy is agriculture, the encouragement of agricultural policies which will ensure the preservation and building up of soil fertility by organic farming and gardening; and the prevention of soil erosion and the destruction of forests and watersheds

It is a terrible fact that many Jews did suffer privations during the war years, but it is high time that we realised that sympathy for the rank and file of the Jews has been exploited to foster the policies of powerful international groups.

The Zionist campaigners, for a Jewish State in Palestine, are more concerned about the Five Trillion Dollar chemical and mineral wealth of the Dead Sea than with the plight of so-called Jewish refugees.

The Jewish question is directly connected with major international politics and there are two aspects of the matter to which I desire to draw attention.

The first is the skilful world-wide campaign designed to create such sympathy for all Jewish refugees that various countries, in particular British countries, will accept them without asking too many questions.

Russo - Jewish Connections

The second aspect, linked directly to the first, is the fact that there appears to be some understanding between powerful Jewish groups and the controllers of Soviet Russia and their stooges throughout the world.

Without attempting in any way to minimise the brutal treatment of European Jews by Hitler's gang of murderers—and never let us forget the fact that the Jews were not the only people murdered—the constant assertion by Jewish propagandists that between five and six million Jews were killed by the Germans is simply not true. No official figures have been published, a very strange fact, but it is possible to make some estimate by an examinat-

ion of known facts. If the figure of Jewish casualties is correct, the Jews suffered more losses than Great Britain, America, Australia, Canada, New Zealand, France, Belgium, Holland, Denmark, Norway and Luxemburg put together.

No reasonable person can believe this.

Number of Jews Killed

Jewish authorities themselves state that, in 1933, the year Hitler came to power, there were five and a half million Jews in Europe. We must deduct one million from this which was the number of Jews who, up until June 21, when Germany attacked Russia, were immune from Nazi persecution as they lived east of the frontier between the Germans and Russians in Poland. When the Germans attacked the Russians a great number of these Jews retreated with the Russians into Russia, a fact to be remembered.

We can see, therefore, that this leaves approximately four and a half million Jews in Europe.

But official figures show that just over 400,000 of these were in countries such as Great Britain, Portugal and Spain.

This leaves four million to be persecuted by the Nazis. This was the total figure in 1933. But figures from all over the world show that, between 1933 and 1945 one and a half million Jewish refugees poured out of Europe to various parts of the world.

And, according to Jewish reports, some 500,000 Polish Jews fled into Soviet Russia.

This leaves the number of Jews actually under the control of the Germans as three million at the most.

(Continued on Page 6)

NOTES ON THE NEWS

Answering a question in the House, Mr. Chifley disclosed that Private Bank shares, bought by the Commonwealth on the share market, were **not** shown on the Commonwealth Bank Balance Sheet, and further that their shares were **not** registered in the name of the People's Government. They were registered in the names of **private individuals**. Here we witness the people's assets being registered in the names of dummies.

This is the kind of practice that enabled the Nazis, such as Goering, Himmler and others to amass and establish large fortunes in other countries. Still as Mr. Chifley would probably say, the reason for this dangerous malpractice is "his love of humanity." He did also say, this practice was discussed with the Trading Banks, which, if true, indicates that they also were parties to this misdemeanour. It's just one more illustration of the low ebb of political morals.

DOLLAR DILEMMA

Mr. Colin Clark, Australian certified economist, after discussions with economic planners in Holland and France says: "If American prices continue to rise the dollar shortage will be righted within a year or two, provided prices do not rise in the rest of the world." Well, well, on this basis the dollar alibi for restrictions and controls will last a long time. However this chappie overlooks the fact that all countries pursue the same financial policy of charging all increased wages into prices, thus prices in all countries must be continually inflated. Of course, British wages and prices may overtake U.S., in which case we could have a sterling crisis by way of variety. This theorist is now on his way to India at the invitation of the Indian Government to discuss its economic development plan, which means chaos for India.

* * * *

SHIRTMAKERS' SCHEMES

Melbourne shirtmakers support the proposal of the Department of Supply to retain controls over shirts, collars and pyjamas, and so we are to suffer uncomfortable inferior wearing apparel because of this section of manufacturers, and a bureaucratic department desire to preserve their monopoly. Of course, competition is headed off by denying materials to new firms willing to serve the public. It is a sad fact that many other manufacturers who have a monopoly between them through socialistic controls, are opposing the removal of these restrictions. Oddly enough, these same people denounce socialism whilst at the same time practising it. They should remember you can't keep a tiger for a pet very long. One day it will turn on you and devour you.

FINANCIERS' FRIENDS

Mr. Ryan (Liberal) who is old enough to know better, suggests raising a loan in U.S. to tide us over the Dollar crisis! Mr. Chifley's refusal is one of the very few of his actions or ideas worthy of comment. Any adult person should know that the Dollar crisis has been created, and is intended to force or fool countries to borrow themselves into hopeless and inextricable debt. Mr. Chifley said "he would rather face the situation than accept the unreasonable rates and conditions." Britain, it will be remembered accepted similar conditions to her sorrow. We can get along quite well without pawning our country to Wall Street Shylocks. The job is to develop and use our own resources. Mr. Chifley could help by removing his socialistic controls and vicious taxes; and by the way, his refusal to borrow overseas raises the question of the impropriety of Governments becoming mendicants by borrowing at all—even at home.

* * * *

PREFERENCE PROPOSALS

The attack on Empire Preference has been carried a stage further at the Geneva talks as aforetold in this journal over a year ago. The dried fruits industry here has received the most severe blow, but wool, dairy produce, etc., have not been hit—yet. Although much has been made of the 25 per cent, tariff reduction by U.S. on wool, it has to be remembered that this was put on in advance some time ago, so that a show could be made of taking it off. In any case U.S. does not produce fine wool like ours and would be glad to have it at all times. The big point is that Empire Preference has been undermined, and that is the real objective of the World Planners. In this connection, Professor Wood suggests a "wait and see policy," and made the following significant observation: "The effects of the Geneva agreement on Empire Preferences and on British pur-

chasing power would depend on decisions made in Washington and Wall Street rather than Geneva (Melb. "Herald." Nov. 20). That should have been hot news for the British Parliament.

* * * *

TRUMAN'S TROUBLES

A ten point control proposal has been put into President Truman's mouth by the Brain Trust, the unseen rulers behind the scenes. Each measure means more regimentation for the Americans, but of course there is the good humanitarian reason for it. There always is. This time it is "to save Europe." The idea is to relieve Americans of their abundant production before they can realise what a high standard of living really is. In sending millions of pounds worth of goods and services out of the country—that is the backing for the money—inflation must occur. Then the plan, as in England, is to take the surplus money from the people via taxation. Thus the Planners cause the inflation and provide the excuse for more taxation and more planning. What a racket! In the long run, of course Europe, or any other country suffering under this export mania will be hopelessly in debt to the real controllers of U.S.

—O.B.H.

JEWISH IMPERIALISM IN U.S.A.

Students of the "Jewish Question will be interested to know that we have for sale a limited number of a copy of a chart showing in detail the connection between Zionists, various international organisations and American organisations which are a "front" for Jewish interests.

Although this chart was prepared before the second World War, it is a most graphic proof of the power and influence of such prominent Jews as Mr. Bernard Baruch. Our copy has been taken from a photostat copy of the original chart.

THE NAZI LINE

"It is time that we civil servants took a strong line with the public and ceased pandering to them."

Member of the British National Association of Women "Civil" Servants — Miss J. Saxby.

THE REAL AIMS OF WORLD WAR II.

"It is therefore, I think, quite possible to state the real as distinct from the proximate objectives of the present war.

"They are:

"(1) The establishment, of the International Police State on the Russian Model, beginning with Great Britain. 'Can we finally rid Europe of barriers of caste and creed and prejudice? . . . our new civilisation must be built through a world at war. But our new civilisation will be built just the same.' (Mr. Anthony Eden, broadcasting to America, September 11, 1939).

This contemplates the complete abolition of civil rights.

"(2) The restoration of the Gold Standard and the Debt System.

"(3) The elimination of Great Britain in the cultural sense and the substitution of Jewish-American ideals.

"(4) The establishment of the Zionist State in Palestine as a geographical centre of World Control, with New York as the centre of World Financial Control."

—C. H. Douglas, in "Whose Service is Perfect Freedom, VI," September 23, 1939

THESE EXPORTS!

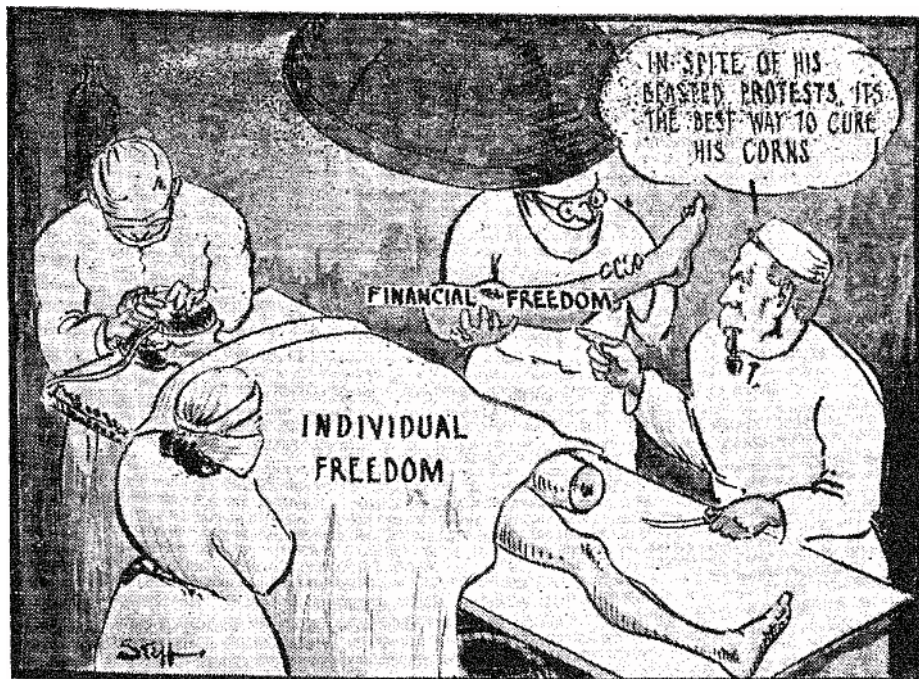

I read.

"Argentina Wants to Buy British," So do the British. They have been wanting to do this for quite a long time. —"Reynolds News."

FLASHBACK! No. 4)

Those misguided people who anticipate any individual benefits as a result of Mr. Chifley's proposed Nationalised Banking, would do well to read carefully and ponder over the following statement made by Mr. Chifley during a Budget speech at Canberra, on September 21, 1944:—

"Social services must be paid for by someone. They cannot be paid for out of what is called national credit, or bank credit. They must be paid for in hard cash . . . It is all very well to say that bank credit and national credit should be used to establish public works. It is useless for us to fool ourselves that we can give to the people of this country social services and social security, and pay for such benefits with national credit. That is madness."

NATIONAL (ISATION) THEATRE

The "Worker" and Socialism

This direction will press most heavily on the manual workers.

They should not let their attention be distracted by assurances that things will be made uncomfortable for other people as well.

There is already emerging the spirit—that became so prominent in the war, when duties like fire-watching ceased to be voluntary and a matter of quiet pride and became compulsory and a matter of watching narrowly to see that no one else escaped.

If the working-class electorates who returned so many of the present members to Parliament find themselves in a position which they fondly hoped had been left behind with the other memories of the war years, they should recognize that these hardships are not dictated by economics but by political philosophy.

The economic crisis could be approached quite differently.

It is being approached in this way, by the prompt, reimposition of a particularly intimate and galling form of compulsion, because that is congenial to the party in power. It springs out of the philosophy they have embraced, which makes the supreme good reside in a quantitative material standard, and if servitude is the price of maintaining or trying to maintain that standard, it is taken for granted that the price must be paid.

Once again we repeat, because the point is fundamental, that we do not think Mr. Attlee expected two years ago that, he would be acting as he is today, any more than he expects today to be bringing in the further final stages of the regime of the plantation

and the overseer, if he continues where he is.

There is an inner logic in Socialism which, as it unfolds itself, takes its own adherents by surprise.

The Labour Party as a whole is full of these men who first grew interested in the condition of the people from humane motives, who began as Mr. Attlee did in the time of Edward VII, at a time when it was still true that the main evils came from inside the capitalist order, and when it was appropriate for Catholic sociologists to think and write mostly about that, as Mr. Belloc and G. K. Chesterton did in their earlier years.

The change-over began to come in the years just before the war of 1914, when Mr. Lloyd George began to introduce German social legislation, and as the Civil Service became each year more and more under the influence of men trained in German political idealism at Oxford.

Since the last war, it has become each year increasingly clear that what threatens men to-day is not the evils they knew in the nineteenth century, but a return in a more acute form of the much more normal and customary evil of oppression by those controlling and utilizing the machinery of State. — "The Tablet" (Eng.), Sept. 16.

No. 49

IS THERE EFFECTIVE OPPOSITION TO SOCIALISM?

Several weeks ago we commented upon the fact that the British electors had voted against their Socialist and Communist masters at the recent British Municipal Elections. However, results to hand from several by-elections held since the Municipal Elections prove that, although increasingly hostile to the present Socialist Government, the British electors are not enthusiastic about the Conservatives.

This is not surprising. There is no evidence to suggest that the Conservatives have any constructive policy to meet the needs of the British people.

Basically, they merely suggest that they can run Socialism much more efficiently than the Socialists. When they were in office they laid the basis for the "planning" upon which the Socialists are now building. A leading article in the London "Daily Telegraph," of October 18, 1946 puts the matter clearly.

"To go no further back than its war-time predecessor, the famous Coalition, the present Government found much of its planning for education, other social services, finance and defence already done . . . Such devices as Exchange Equalisation Funds, the accumulation of projects for public works, qualitative regulation of imports, censuses of production, adjustments of taxation to economic or social purposes, have been used by a long succession of Governments, not excepting the Socialistic Government of 1929-31 . . ."

If the professedly anti-Socialist party political groups in Great Britain and other parts of the British Empire are genuinely desirous of defeating the Totalitarian State, they must realise that a new approach to basic problems is urgently required if they are to succeed. It is worse than futile for them merely to criticise the mistakes of the Socialists without putting forward constructive policies which will enthusiastically rally the electors in opposition to the "Planned State."

We have just finished reading the debates at Canberra on the Banking Bill. Not one "Opposition" member even touched on the basic objections to the nationalisation of banking. The dreadful depression years, which the Labor Members attempted to use as a background for their arguments, were practically ignored by Liberal and Country Party Members. Many of them left the unfortunate impression that they believe that Australians were enjoying comparative prosperity before the war and that there was no room for financial or any other type of reform.

They don't appear to have grasped the fact that the Socialists and Communists have only made such dangerous progress because of their failures in the past.

Like the British Conservatives, the non-Labor Parties in Australia initiated practically every major policy since extended by the Curtin and Chifley Governments.

The central theme of Socialism is centralisation of power.

The sincerity of the Liberal and Country Parties can be tested by their attitude towards this issue.

What we would like to see from the present Opposition Parties is a definite pledge that, if elected at the next Federal Elections, they will, before starting to pass any more legislation, progressively repeal the legislation and regulations which are at present sapping individual initiative and paralysing industry.

We would like to see an unqualified assurance that not only will more powers for Canberra not be sought but that most of the powers already centralised at Canberra shall be disgorged. Further, we would like to see proposals put forward to limit the power of the Federal Government and to give electors more effective control over Members of Parliament.

If Liberal and Country Party leaders will not direct their policies along these lines it is obvious that their alleged opposition to Socialism is merely verbal and that, if elected to office in 1949, they will fail just as dismally as they did during the pre-war years.

A BUSINESS OF YOUR OWN!

Any energetic person—man or woman—can earn a comfortable income by selling the well-known Science of Life series of health books from house to house. With a capital of £5, selling agents can build up an independent business of their own. Send for full particulars to Science of Life Books, Box 4397, G.P.O. Sydney.

NOTICE TO T.B. SUFFERERS

We desire to make contact by letter with T.B. sufferers in any part of Australia who are not satisfied with the progress they are making, and who are prepared to undertake the treatment for T.B. as recommended by Dr. Gayelord Hauser, the famous American nutritional scientist and other doctors of note.

This treatment involves no drugs, and so far as we are concerned, the full particulars of the curative principles will be given free of charge.

We are anxious for 100 T.B. sufferers to give this treatment a consistent and conscientious trial for a period of 12 months. If necessary, it can be carried out under the supervision of their own doctors.

If the results prove as satisfactory as we believe they will be, this mass test may revolutionise the treatment of T.B. . . .

VITAL NEWS FOR MOTHERS!

Two new titles have just been added to the Science of Life Series of Health books:

A Fool-proof Formula for Mothers and Babies 2/-
Child Ailments—How Caused, How Cured, How Prevented 2/-

The first-mentioned book tells of the amazing new knowledge that enables mothers to have perfectly healthy children, with a high resistance to all infections. This knowledge also assists the mother to retain her health and beauty.

The little book on child ailments deals with the cause and cure of the common illnesses of childhood. This new knowledge is the latest word in medical science. About 35 common ailments are dealt with, with full particulars of the new treatment, which is so uniformly successful.

Incidentally, children don't have to have the usual ailments of childhood. They can be PREVENTED. This little book tells how.

Add 1½d. for postage.

THE CASE FOR THE PALESTINE ARABS

The following summary of a statement given at a recent press conference in London by Musa Bey Alami (Director-General of the Arab Offices on the Recommendations of the United Nations' Special Committee on Palestine) appeared in "Tomorrow" (Eng.), October, 1947:

1 The recommendations are utterly unacceptable to the Arabs. This applies to both the majority and the minority reports.

2 The recommendations are riddled with inconsistencies between the general principles postulated and the concrete measures proposed. On the one hand, the Committee decides that the Mandate should be terminated and that independence should be granted at the earliest possible moment. It also affirms that democratic principles and the protection of minorities must be a prior consideration of the grant of independence. On the other hand it makes recommendations which deny the most elementary democratic rights to the Arabs in their country. It seeks to give the Jews not the normal rights of minorities, but either territorial sovereignty in a part of Palestine or equal weight with the majority in a Federal State. Again, on the one hand the Committee states that economic unity is essential to the health and development of the country and seeks to ensure it by co-operation between Arabs and Jews on an economic commission, while on the other it recommends partition on the assumption that co-operation is impossible.

3 The recommendations do not offer any finality at all. By linking the Palestine question with the problem of European Jewry, by providing for continued immigration, by imposing limitations on the sovereignty of the independent State or States to be created, and by bringing the United Nations as a permanent factor into the picture, the Committee leaves the final issue unsettled and the door open to continuous tension and friction.

4 The Committee's entire approach to the question was pre-determined in a sense very prejudicial to the Arabs, both by its terms of reference and by the general drift of the debate and the character of the proceedings at the special session of the U.N.O. Assembly at which it was set up. Under Zionist pressure and with strong American backing for that cause, the entire session took on a markedly anti-Arab and pro-Zionist colour, and it became clear that the United Nations were going to shrink from the fundamental moral issue and that the elementary and unanswerable justice of the Arab case was going to be once more side-tracked. For this reason the Arabs of Palestine boycotted the Committee, a decision now completely

justified.

5 Partition is not a fair and reasonable compromise. It is an almost 100 per cent, pro-Zionist solution. It is nonsense to pretend that to divide a country between its own people and rightful owners on the one hand, and a body of invaders who have no right to it whatever, on the other, is a just way of settling the dispute between them. Moreover Partition would solve nothing but merely create two problems where only one exists to-day. Lastly Partition, as the Woodhead Commission found out in 1938, is not feasible.

6 Nor is the Federal state solution on the basis of parity between the two communities either less unjust or more feasible than Partition. The constitution proposed for the state would simply not work at all. It would break down on the issue of immigration alone, and the result, would be deadlock and paralysis of Government.

7 The Arabs therefore reject the recommendations of the Committee and will reject and oppose any decision which the United Nations may take on their basis. A manifest injustice does not become just merely because the United Nations may for reasons of its own decide to espouse it. The United Nations cannot alter the universal principles of international morality by which it is itself bound and from which it takes its being. It can either uphold them and so prove true to itself, or violate them and so betray its sacred trust. Nor can it defy the facts of history and geography. Historically, geographically, ethnologically and economically, Palestine is a part of the Arab world and its destiny is to develop as a part of that world. A Jewish State established in a part of it would be an anomalous body, rootless and isolated inimical to the harmonious evolution of the Arab countries and extremely precarious in itself. Imposed by violence it would be opposed by violence.

The Palestine case is a test for the United Nations. If its decision on this case defies the principles of democracy and justice as well as the facts of history, that decision would be defied by the Arabs, and the responsibility for the consequence will not be theirs. The Arabs have abundantly warned the world that any attempt to impose partition on Palestine would be resisted by them with all the means in their power.

Let there be no doubt, whatever that they will do so and that partition would therefore plunge the Middle East into a state of war. I cannot predict what shape that war would take nor how soon it would start, but I am positive, and so is every competent observer of the Middle East that to force a Jewish State on the Arabs, even in a part of Palestine, would create an explosive situation throughout the Arab world which sooner or later, and probably sooner rather than later, would lead to a general outbreak of violent conflict. The fact that a war in the Middle East might precipitate an international conflict of incalculable dimensions would almost seem to suggest that those who are pressing for partition in Palestine would not be averse to the outbreak of another World War.

Actionists Needed For Double Dissolution Campaign in S.A.

The Petition sent to the Governor-General respectfully demanding a double dissolution of the Federal Parliament has been taken up by the League of Rights in South Australia. All South Australian readers of the "New Times" and their friends are urged to call at, or write to Headquarters, 17 Waymouth Street, Adelaide, or Box 1569M, G.P.O., for copies of the Petition and to collect their quota of signatures.

The Annual Meeting of the South Australian League of Rights will be held in the rooms, 17 Waymouth Street, on Friday, December 12th, at 8 p.m. In addition to a report of the activities of the League during the first year of its existence, important proposals for a programme of activities in the future will be placed before members.

It is proposed to hold an inter-State conference later in December, at which a Commonwealth-wide plan will be discussed for work in the new year. The drafting of a new Bill of Rights and consideration of various aspects of a "Defend the Constitution" campaign will be two highlights of the conference.

All membership fees should be paid up, on or before the day of the Annual Meeting.

Organiser: E. C. Finn.

Unmasking High Jewish Policy

(Continued from Page 1)

Now, as the British-American Palestine Committee "estimates" that there are just over one and a half million Jews still living in Europe, it can be confidently asserted that less than one and a half million can be counted as "dead or missing."

Even accepting this figure as accurate, it reveals that Jewish propagandists have exaggerated their casualty figures in a most, dishonest manner.

The Use of U.N.R.R.A

All Christian people are appalled at the persecution of the rank and file of the Jews, the same as they are appalled at the persecution of the Poles and other peoples. But they are very foolish if they permit their sympathies to be exploited to the extent that they refuse, for fear of being termed "anti-Semitic," to face the ugly fact that many so-called Jewish refugees are being used to further policies of world enslavement.

It will be recalled that soon after Germany attacked Russia, Stalin permitted 100,000 Poles in Russia to leave for military service with the British Armed Forces. Significantly enough, no Polish Jews were permitted to leave. As soon as the war finished, however, these Jews started to leave Russia and make use of Unrra, which was predominantly controlled by American Jews.

Unrra, under Jewish control, was used to pour large supplies of American and British food into Soviet dominated Europe. The use of Unrra to get so-called Jewish refugees out of Soviet-dominated Europe into the American zone and then onto Palestine and elsewhere was roundly denounced by the first British controller of Unrra in Eastern Europe, Sir Frederick Morgan, who said that most of the Jews were not refugees at all, but were simply Soviet espionage agents.

I have recently talked with an Australian who was a member of Sir Frederick Morgan's staff and he assured me that Sir Frederick's statements were substantially correct. Every well-informed student of international affairs knows that many Jewish "refugees" entering this and other countries are more enthusiastic about Communism and Soviet Russia than they are about the British Empire.

Communist Espionage

Some of them are certainly conscious espionage agents for the Communist conspiracy. As a close student of the

Jewish question, I have been struck by the fact that very, very few Zionists are ever critical of Soviet Russia.

A Miss Wesker, of the British-Soviet Society, upon returning from the Soviet, has stated that synagogues are being erected in Russia before houses. Mr. Louise Levine, a leading American Jew, informs us that the "Soviet Jews as the entire population, are at one with the Soviet Government. The Jewish people are unanimous in their love for Stalin."

The Soviet dominated Governments of Rumania, Hungary, Yugoslavia and Poland are packed with Jews.

When a few British hot heads threw some stones through the windows of Jews' shops in Great Britain—this was just after two British sergeants in Palestine were foully done to death by Jews—a Russian cable expressing sympathy with British Jews was received by the victims of British "anti-semitism."

The upshot of this has been the sending of a delegation of British Jews to Russia. This is a most significant event.

International Conspiracy

This connection between International Jewry and International Communism is something which must be clearly understood by all those interested in the preservation of the remnants of Western Christian civilisation. It is no use Australians saying that what happens in the Middle East as the result of the Zionist campaign does not concern them.

There is no argument about the fact that International Communism is a conspiracy directed towards the enslavement of all countries.

The controllers of the conspiracy are using so-called refugees as espionage agents. Never let us forget that the overwhelming majority of those found guilty in the Canadian Spy Trials were Jews.

This does not mean that all Jews are traitors. Many of them are some of the finest citizens one could meet anywhere. But this must not blind us to the fact that there is an unholy alliance between International Jewry and International Communism.

The fact that one and a half million Jews were killed in Europe must not be used to so arouse our emotions that we are prepared to stand by while friends of Soviet Russia are brought to this country in increasing numbers.

The "Smear" Campaign

It is not popular to talk openly about these things. But we must all speak out in these critical times. I have been abused from one end of Australia to the other because of my comments on the Jewish Question.

And I have noted that most of the abuse has come from the Communists. They seem to feel that they have a special mission to ensure that no one says anything critical about International Jewry and its policies. They have consistently taken the side of the Zionists in Palestine and have attacked the Arabs.

No doubt they will soon be urging that Australian and British troops be used to compel the Arabs to allow the Jews to have portion of their country. We have seen country after country destroyed by the Jewish-Communist combination.

It will destroy the British Empire unless those who call themselves loyal Australians are courageous enough to speak out. Let us face the truth. It is no secret that various moves have been made to try and have my criticism of Jewish policy silenced. One prominent Socialist who has a regular radio session over a Melbourne station, and who is firmly entrenched at the Melbourne University, recently associated me with Mosley and said that this country could do without me. Communist louts have stated that I will be the Petkov of the Australian Revolution. All this does not deter me in the slightest.

The Correct Approach

To those who, when the Jewish Question is mentioned, mention the Jews murdered by the Germans I reply: "Yes let us never forget that some human beings can so brutally treat other human beings. We can all remember that millions of Russians have died under the Stalin regime, and that Russian casualties were heavy in the war against the Germans."

But the appalling suffering of the Russians must not paralyse our actions in dealing with the Communist fifth column menace and the grave threat of international revolution. We are fighting for survival and must ignore all attempts to cloud our common sense by appeals to our emotions.

—From a Radio Talk over 3CS, Colac.

Dr. Sanger And The Six Million

The Melbourne "Sun," of December 6 reports Rabbi Dr. Sanger as saying at a Jewish service to commemorate the partition of Palestine, that "six million nameless dead prove that we deserve it" (Palestine). In his radio talk published in this issue, Mr. Eric D. Butler exposes the persistent assertion that six million Jews were victims of Hitler as lying propaganda by the Zionists.
