Thought for the Week: "Our doubts are traitors,
And make us lose
the good we oft might win,
By fearing to attempt."
- Shakespeare ..

THE CANADIAN MULTI-CULTURAL DISASTER: Eric Butler reports from Toronto, Canada:

This report is being written on the eve of leaving for London. The multi-cultural faddists continue to hold Canada up as a shining example of the success of their theories. There was a time when Toronto was the biggest Anglo-Saxon city on the North American continent. A current projection shows that by the year 2000 the Anglo-Saxons could be a minority of 10 per cent. The character of Toronto has changed dramatically, with a flood of West Indians and other non-Europeans. The police battle with a rising crime rate, but are not supposed to mention that non-Europeans dominate in the field of violent crime.

During a series of meetings in Ontario, I was made aware of the rising concern of the English speaking majority of the threat of compulsory bi-lingualism. The policy first introduced by Fabian Socialist Pierre Elliott Trudeau. There is a rising tide of anger, particularly when in Quebec there is a policy of uni-lingualism with the English speaking 20 per cent being blatantly discriminated against. Now comes the harebrained suggestion in Ontario that where there are at least 25 people of any cultural background, they should be entitled to instruction in their own language! It is estimated that there could be at least 50 or more groups entitled to such instruction!

It has been a sight to behold as the political parties spend large sums of money to buy tickets for West Indians, East Indians and others to bus them in to party nomination rallies. Some of these people are standing as candidates with the veiled suggestion that

they see parliament as a means of increasing their own group's influence. A recent decision of the Ontario Court of Appeal, has resulted in Ontario Education Minister ordering that the Province's public schools will only be allowed to begin each day with The Lord's Prayer if accompanied by teachings from other religions. This decision is designed to reflect the reality of the multi-cultural society.

Jewish pressure has been applied in the United States for years against any Christian influence in the public school system. Now Canadian ex-servicemen have been shocked by a Department of Veteran Affairs instruction that the traditional white crosses should not be used at any Remembrance Day services in centres operated by government. The ruling follows complaints that the cross might offend certain "religious sensibilities". This is another way of saying that there had been Jewish complaints about the use of the traditional Christian cross. Some Canadian Legion representatives have complained, but as some of its own Members point out, Legion leadership "sold the pass" over twenty years ago when they agreed to have the Union Jack with its three Christian Crosses taken out of the Canadian Red Ensign. However, at long last Canadian Christians of all kinds are beginning to realise that Christian Canada is finished unless they pull together against their common enemy.

WHY SOCIETY NEEDS ITS DISSENTERS: "The House of Representatives' Legal and Constitutional Affairs Committee is examining the League of Rights. It seems there is concern about where the League gets its money."

- John Hyde, in The Weekend Australian, November 26-27.

According to Mr. Hyde, the "enquiry" is already proceeding: we are hearing a variety of different, and differing, reports, but the number of articulate commentators who deplore the very notion of any "enquiry" into a legal, law-abiding body, however "controversial", is growing. All agree that there is a gross abuse of parliamentary power taking place. All agree, "the League of Rights today, then who tomorrow?". A most dangerous precedent, which could even be turned back on today's eager "enquirers" by some future government. The precedent is there. Mr. Hyde thanks the League of Rights for introducing him to the important book, "The Road to Serfdom", by Professor F.A. Hayek, which deals, among other matters, with the abuse of political power. Mr. Hyde reminds us that the power to "discipline" so-called divisive groups is a worse "evil" than the divisive groups themselves. Divisive groups should be tolerated, in a democracy. That's the line adopted by Mr. Hyde, and we agree that this is fair enough. Of course, who is to say what groups are divisive? That's another question. How about the "multicultural society"? That's not divisive, we suppose. What about the demonstrating Macedonians and Croats over the past few days. What about the Yugoslav boy being shot outside a Yugoslav Consulate in Sydney. Is all this Senator Ray's idea of perfect racial harmony?

The multicultural society is, for one thing, bringing into Australia many of the hatreds and tensions from Europe that have existed for centuries. What idiocies are perpetrated by politicians!

THE LEUCHTER REPORT: In the last issue of On Target (November 25th) Eric D. Butler, in his report from Canada referred to the Leuchter Report as a "historic document": and indeed it is. Mr. Butler mentioned that it was the Leuchter Report which convinced British historian David Irving, that the Holocaust is a hoax: the mass gassings could not have possibly occurred. We have before us a copy of the Leuchter Report which it may be possible for us to make available to supporters, in due course. We shall see.

There is an "Introduction" by Dr. Robert Faurisson, the internationally known French revisionist historian. The full title of the Report is - The Leuchter Report (The End of a Myth): "An Engineering Report on the Alleged Execution Gas Chambers At Auschwitz, Birkenau and Majdenek, Poland."

We can merely cull some relevant extracts from the Report (the full Report runs to 192 pages): "Summaries" could possibly be made available.

Dr. Faurisson writes in his Introduction: "Fred A. Leuchter, 45, is an engineer living in Boston, Massachusetts, who specialises in the design and fabrication of execution hardware throughout the United States. One of his major projects was the design of a new gas chamber at the Missouri State Penitentiary at Jefferson City.....

"I decided to ask (Fred Leuchter) to prepare an expert opinion on the alleged gas chambers in Auschwitz, Birkenau, and Majdenek.

"Synopsis and Findings:

After a study of the available literature, examination and evaluation of the existing facilities at Auschwitz, Birkenau, and Majdenek, with expert knowledge of the design criteria for gas chamber operation, an investigation of crematory technology and an inspection of modern crematories, the author finds no evidence that any of the facilities normally alleged to be execution gas chambers were ever used as such, and finds, further, that because of the design and fabrication of these facilities, they could not have been utilised for execution gas chambers.

Additionally, an evaluation of the crematory facilities produces conclusive evidence that contradicts the alleged volume of corpses cremated in the generally alleged time frame. It is, therefore, the best engineering opinion of the author that none of the facilities examined were ever utilised for the execution of human beings and that the crematories could never have supported the alleged work load attributed to them...."

"Methodology:

The procedures involved in the study and forensic analysis which resulted in the report were as follows:

- 1) A general background study of the available material.
- 2) An on-site inspection and forensic examination of the facilities in question which included the taking of physical data (measurements and construction information) and a considered removal of physical sample material (brick and mortar) which was returned to the United States for chemical analysis.
- 3) A consideration of recorded and visual (on-site) logistic data.
- 4) A compilation of the acquired data.
- 5) An analysis of the acquired information and comparison of this information with known and proven design, procedural and logistic information and requirements for the design, fabrication, and operation of actual gas chambers and crematories.
- 6) A consideration of the chemical analysis of the materials acquired on-site.
- 7) Conclusions based on the acquired evidence."

"CONCLUSION:

After reviewing all of the material and inspecting all of the sites at Auschwitz, Birkenau and Majdenek, your author finds the evidence as overwhelming. There were no execution chambers at any of these locations. It is the best engineering opinion of this author that the alleged gas chambers at the inspected sites could not have then been, or now, be utilised or seriously considered to function as execution gas chambers. (emphasis in original).

"Prepared this 5th day of April, 1988 at Malden, Massachusetts. Fred Leutcher Associates.

(signed) Fred A. Leuchter, Jr.,
Chief Engineer.

BRIEF COMMENT: The Asian Studies Council (Chairman, Dr. Stephen Fitzgerald, former Australian Ambassador to China) is telling us that we must "go" Asian.

The Australian education system is no good (we agree with him, but most probably not for the same reasons O.T.) We are in the Asian region of the world, we must learn Asian languages, Asian history, Asian this, and Asian that. Please don't mention that "shudder-word", British!

All the rest of it: "Asian Dynamos", huge Asian markets to be exploited by us, etc., etc. We've already mentioned in these pages that the "Asian Dynamos" could collapse overnight.
