A Problem Correctly Stated Is Already Half Solved	4

Thought For The Week: Note To the Australian Christian Lobby from Betty Luks

It is now nearly sixty years since I first asked myself the question: "If this is communism, (my husband lived under that regime) what is the Christian answer?" As a result I have spent those 60 years seeking answers to the original question.

I am not surprised that the term 'social credit' has been 'hijacked' by the One Worlders. They know, although you may not, that that is the term which was coined 100 years ago by a movement of Christian men set up to come against the earlier push for a world government. But you see, too many Christians at that time were intent on following Karl Marx rather than Jesus Christ.

I have selected some notes from an article written over twenty years ago:

A society living in fear and terror, such as witnessed under totalitarian and oppressive regimes, rather than living with love, loyalty and trust, etc., will not be able to draw on its social credit.

A society dominated by fear and superstition will fail to utilise its potential social credit. Chinese 'Social Credit' is a surveillance system using the carrot and stick approach to keep its citizens under control.

There will be many and varied associations within a nation; a nation is a complex association of associations.

A free society should be unified or fragmented to whatever degree the particular association maximizes satisfaction for its individual members. We need to understand WHY this is so:

Running through the nature of all existing matter, energy and space throughout the Universe there is something we define as 'a governing rule or law'. Greeks referred to it as *Logos*: which has been translated into English as '*Word*'.

"This 'Word', this 'Logos', has a multiplicity of names: the engineer and the artist refer to it when they say they have something just 'right'. Other people mean the same thing when they talk about absolute truth or reality. We all recognise its existence when we come face to face with it in art or architecture, in poetry or music, or in literature. We may not have given it a 'name' but we know when we have 'seen' it or 'experienced' it.

Genuine success accompanies a consistent attempt to discover and conform to this Logos - this governing rule or law in all aspects of Life. This is true of every phase of human activity.

The reader will recognise the following statement as an engineer's (C.H. Douglas') penetrating elaboration of Christ's command * :

***"To the extent that Man seeks, finds and obediently adheres to the Canon
-- the Law of Rightness governing the Universe --
he will find himself in harmony with Creation and
attain 'satisfaction' and 'happiness' in living after which he strives.***

To the extent Man ignores the Canon or flouts it, he will bring disaster upon himself."

[Canon: from the Greek *Kanan* meaning a straight rod; rule or law; a general rule or principle.]

* Christ said: "Seek ye first the Kingdom of God and His Righteousness" rightness, i.e., right relationships, motives and priorities, "and all these things shall be added unto you" - that is, gained by you.

The chaos we see all around us is the direct result of flouting this Canon, the Law of Rightness - the fragmenting of families, the upsurge of drug abuse, the rebellion of youth, the growing social violence, the abandonment of ethical standards, the growing economic instability reflected in increasing taxation, spiralling debt and industrial unrest, and the burgeoning centralisation of power into fewer and fewer hands. It is inherent within this Law that all which conflicts with it will be destroyed. These evils have within them the seeds of their own destruction...

(Mr. Iles, the above was compiled over twenty years ago.)

THESE DAYS OF TRIBULATION By Arnis Luks

The 18-second Adelaide hotel Covid-19 breach that brought misery and despair to seven million Victorians
<https://www.theaustralian.com.au/nation/politics/the-18second-adelaide-hotel-covid19-breach-that-brought-misery-and-despair-to-seven-million-victorians/news-story/7c43c0d519dd57999e9c95b177292f73>

Melbourne is experiencing its fourth lockdown based on a supposed '18 sec. breach of a SA hotel door'. We were originally told it would be for (at the most) two weeks. Four times, a city of 5.2 million people has been placed under house arrest to avoid a phantom ghost. I understand only **one person is experiencing symptoms that require Intensive Care**. Face masks are now to be the newest 'norm' from this state totalitarian apparatus.

Officials have no shortage of charts and computer-generated models and a flurry of statistics that don't seem to mean much. Our hospitals are not overloaded, nor are our funeral parlours. Yet for 15 months the state's major employer - the small business economy - has been lunched. The only facilities pressed to any measure are those for PCR testing or receiving the jab in the hope this will end the nightmare. It won't. It never will until....

I personally don't know anyone who is, or has been physically affected by this indistinguishable phantom. I certainly know plenty who have suffered significant financial, economic and psychological hardship.

In my morning outing I noticed the sun still shining, the sky clear and the birds and bees still active. The garden is flowering and the crops are still growing. I recently read a booklet about *Arctic Ireland* - the famine in 1740-41 Ireland. It makes for sobering reading when an unprecedented Arctic chill suddenly came across Ireland that devastated planted crops and stored food supplies for two seasons, causing about a 40% increase in the number of deaths through starvation and cold. Their circumstances were real and obvious. You only had to walk outside to see the carnage of the starving and dead in the paddocks and pathways.

Australia is not experiencing anything of this sort. What is occurring is entirely in our minds, our imagination. The propaganda wing of the political and financial administration – the Main Stream Media – has provided a never ending onslaught of misinformation and downright lies for the past 15 months to the point that what was denied for the past 15 months, is now confirmed as 'always was'. Reports are indicating the mRNA injection side-effects are worse than the original threat. Mortality rates from the injection far exceed adverse reactions from historical vaccines.

The efficacy of the mRNA injections and their foundational research is questionable if not downright fraudulent. Fauci and Gates have now become the great unwashed and yet for the previous 12 months they both

ON TARGET

were the untouchables. The owners of the patents for these products stand to profit billions with no liability, nor apparent improvement to anyone's health. The causal narrative from the wet market 'bats' has now changed but the objective is still the same - mRNA injections to permanently alter your immune system. Where are we going? The Gadarene swine, depicts the archetypal frenzy towards self-destruction, the mindlessness of the crowd's behaviour. Don't be part of that crowd.

Financial Support Ending

This current lockdown will not be supported with the in-debting tax dollar to the same degree as previously. People are being exposed to increased financial hardship with little income and mounting obligations.

While all this is occurring, the blame for this fiasco is being mis-directed towards the elderly, as 'those who have' by 'those who do not have' - a future. This is the seedbed for class warfare, when in fact it is (government-administered) financial policy causing this economic carnage for all, especially the younger generation.

Climate

Sharma by her litigation representative Sister Marie Brigid Arthur v Minister for the Environment [2021]

FCA 560

<https://www.judgments.fedcourt.gov.au/judgments/Judgments/fca/single/2021/2021fca0560>

The federal court in a judgement states the environment minister has a duty of care to young people in regard to climate mitigation. What specific and tangible outcome does that finding mean? It could mean almost anything...

Note: Global Warming has now become Climate Change.

Different title - same objective.

Lima All our heavy industry has been shutdown as a consequence of the 1975 Lima declaration - https://alor.org/Storage/Library/PDF/Lima_Declaration.pdf

Successive governments have actively participated or stood idly by while our heavy industry and national security has been decimated. We have had 15 months of no effective manufacturing industry in Australia (also the western world), and yet the supposed cure against this other phantom menace - climate change - has not been addressed sufficiently. It is a never-ending demand to destroy our independence and self-reliance. When courts have become politically guided and become prophetic institutions (effects of 2°, 3°, 4° future world scenarios) instead of upholders of our ancient freedoms and rights, law becomes arbitrary and unjust.

We see this with the shutting down of small business in Victoria while those on government payrolls are permitted to perform the same tasks without restriction or financial penalty. Our governments are actively working against the best interests of us as a free people and sovereign nation. They are the problem.

Our governments have been taken over by financial interests.

The Victorian budget, while increasing land and stamp duty tax rates from 5.5% to 6.5%, have just compounded their encroachment further into the abstract world of property values. I was reliably informed that the price for even modest properties in the greater Melbourne region had increased around 30% in the previous 12 months. To any individual property owner this translates into 30% increases to insurance, water/sewerage, local government, and state government charges. Somehow or other property owners need to find more than the 30% increase in after-tax income, or a rationalising of personal expenses, or both, in order to still remain viable.

The forever increasing of government's property charges is being lifted higher and higher. At some stage the domino effect of properties coming onto the real-estate market due to financial duress will occur. At that point property values will plummet. One contact mentioned that they had moved from 'almost freehold' to now \$65,000 in mortgage across the previous 15 months. Property must be considered as sacrosanct against taxation in order for individuals to maintain their freedom and self-reliance. By progressively confiscating greater and greater proportions of property through taxation, individuals will be reduced to a level of subsistence and homelessness. This policy outcome is in accordance with Great Reset, Sustainable Development and Agenda 2030 – to own nothing and be happy.

Victorian Covid-19 lockdown: Stay-at-home order a \$1.3bn hit to national economy

<https://www.theaustralian.com.au/business/economics/victorian-covid19-lockdown-stayathome-order-a-13bn-hit-to-national-economy/news-story/cd18ee1683c7b513cc1191608e2487e3>

Businesses are going to the wall and people are well on their way to losing their jobs and their homes. How more serious than that can it get? When politicians routinely neglect to protect the direct interests of their constituency, it is time to initiate novel methods of political persuasion to bring control of government back.

Canada - Key Small Business Statistics — 2020

https://www.ic.gc.ca/eic/site/061.nsf/eng/h_03126.html

Small business are the principle employer across the free world. I was reading this morning of the statistical effect of the lockdowns to the small business economy in the Provinces of Canada. They are the principal employer and the most affected employer-group during the lockdown, employing 65% of the total workforce. Monopoly concerns, with their 11.5% of the workforce, are given almost unfettered opportunity and taxpayer funded financial-support to encroach into greater market share, while the small businesses are forced to 'shutter' their doors, somehow or other being deemed non-essential services. The intention of this policy is

to collapse the middle-class, while at the same time expanding the government's participation into the real economy - the nexus of capitalism and communism as one. This is communism in action, the state being the principal employer of no choice, while the real assets and the community's real credit is handed over to monopoly interests. Again - this policy outcome is in accordance with Great Reset, Sustainable Development and Agenda 2030 – to own nothing and be happy.

Vaccine Passports

The waters are being tested by the MSM for the introduction of the vaccination passport, as the public are being softened up to more readily accept this internal passport. Vaccination passport of course, will represent some type of licence to live with a promise of some restoration towards normality, which it will not. The new norm is just that, facemasks, injections and more lockdowns as historical freedoms disintegrate into the aether — ether (alternative spellings).

It Is Not A Vaccine At All

I've had no trouble to find many conflicting reports on the efficacy of the mRNA injections, from being a minor irritant to the tool of eugenicists - the deliberate killing of people. This month's sister publication our *New Times Survey*, carries an article concentrating on mRNA injections, providing 18 reasons to carefully re-consider your personal health management. Reason and consideration must be at the forefront on this matter of the mRNA injection. The Fauci / Gates narrative has collapsed and they are both offered up for destruction. It is now China as producer of this 'bio-weapon'. The objective is still the same, mRNA injections, facemasks, lockdowns, passports, all via totalitarian government.

While You Weren't Looking

In the middle of a (so far) 5-year drought, California is now emptying its dams. It is not winter with the threat of flooding but going into summer with reserves below 60%. Last year these reservoir levels were safe at 80%. Government policy no doubt. Water prices will again go through the roof even though there could be plenty of water for everyone. Monopoly Capitalism working in tandem with a communist government. What did I just hear you say about the similarities with Australia's power generation and water industries? Or was I just hearing my own thoughts?

<https://www.naturalnews.com/2021-05-27-record-breaking-drought-california-officials-draining-reservoirs.html>

Shall We Replace this Beelzebub With Another Beelzebub, Or Shall We Pursue Truth

Dialectics is the clash of opposites. Dialectical Materialism uses this clash to produce a new synthesis. This philosophy is what we see outworking.

Liberal (conservative) is replaced by Labor, yet the political results is always the same - more centralising.

We try the opposite, Labor replaced by Liberal and see exactly the same result every time. This is why I go to such lengths to highlight the historical treachery of both options. We must look for Truth - the Canon - to provide the correct answer to the problems of today - a real alternative to the centralised control exercised by the money-power via our governments, and now industry.

Labor will do anything except lift the burden of never ending work (and now irredeemable debt through taxation) from the working man. Liberal will do anything except make everyone a small capitalist. Douglas Social Credit provides the solution - the Canon. In that each shares their portion of the cultural inheritance in the form of the National Dividend (small capitalist) and the yoke or burden of work is correctly placed onto the shoulders of the machine. Man, once again becomes 'free enough' to render those things unto God which belong to God, while limiting the influence of Caesar to those things which belong to Caesar.

I believe it is the individual who must rise to the occasion, not the barons or knights or exceptional religious leaders. This can only occur if sufficient individuals accept their personal responsibility to bring about God's kingdom on earth as in heaven - to overcome the money power and place the financial / economic systems in the correct relationship within the community, as a method of weights, measures and distribution, not as currently, a system for exploitation.

Douglas Social Credit Training

Douglas Social Credit is the disciplined science of social engineering measured in terms of human satisfaction.

DSC looks for the Truth which governs human associations.

DSC is found predominantly in the areas of philosophy, politics, constitutionalism, society, economics and finance.

DSC is concerned in any other discipline which considers the satisfaction of human beings an important factor.

DSC Training is available in four semester workpacks, steadily developing the individual's understanding of the **Science of the Social Credit** measured in terms of human satisfaction. Our online training initiatives include:

1. **Social Dynamics Videos and Booklets** available on our alor.org/ website front page.
2. **Introducing Social Credit by Betty Luks** is built around five modules, as well as Video and Podcast discussions around the Science of the Social Credit.
3. **Intermediate Social Credit by ED Butler** includes eight written assignments, Video and Podcast discussions around the Science of the Social Credit.
4. **Advanced Social Credit** is conducted with the assistance of experts in this science, included are the historical '*Elements of Social Credit*' by Tudor Jones, (*originally produced by the Social Credit Secretariat*), two courses including texts, Video and Podcast discussions and other reading material; and on examination to ensure an advanced ability of understanding the Science of Social Credit measured in terms of human satisfaction.

Effective Political Action

I've received several communications in regard to planned resistance events. While wanting to support these initiatives, I've got to ask the difficult question of "what is it that we can agree on?" If a group cannot agree on an objective, then reduce size until such time as those that are left can agree, so effective action can be initiated. This question isn't about means or methods, it's about objectives or ends. What is it that we can agree on? In my case, it is that I do not want the introduction of any type of vaccine passport. If others can agree on this one objective, then we can set about to achieve this. Strategies can be sought and trialled for effectiveness. If proven effective, then implemented in an ever-increasing field of influence. If ineffective, then adjusted or dropped completely, while trialling another.

The objective is the key. The methods are secondary.

A Problem Correctly Stated Is Already Half Solved

Others may have other objectives, but it is critically important to recognise the problem as stated, that what is really being 'sought' is a VETO mechanism to:

limit the power of government over the individual.

Can pressure be exerted sufficiently on your political representatives to change the course of public policy to achieve your limited objective? If not, why not? That is their job to represent the electorate. There is also the further option to actually replace your representative.

Educating your electorate cannot be over-emphasised.

Regular pamphleteering, or the production of a newsletter / newspaper can do wonders to the way people think. Whatever the mechanism, the electorate - your electorate - is the fertile ground from which you can launch your efforts to restore our ancient freedoms. It is not rocket science, but determination and intelligent direction of energy (with a sufficiency of faith that your efforts can achieve the desired results). Some might call this effort incarnating your faith - on earth as in heaven.
