AUSTRALIA DAY 26TH JANUARY

<https://www.navyhistory.org.au/the-australian-national-flag/>

OUR FLAG - THE POEM By Robin Northover

Our Flag wears the stars that blaze at night,
In our Southern skies of blue,
And a little old flag in the corner
That's part of our heritage too.

It's for the English, the Scots and the Irish,
Who were sent to the ends of the earth,
The rogues and schemers, the doers and dreamers,
Who gave modern Australia its birth.

And you, who are shouting to change it,
You don't seem to understand,
It's the flag of our laws and our language,
Not the flag of a faraway land.

Though there are plenty of people who'll tell you,
How when Europe was plunged into night,
That little old flag in the corner,
Was their symbol of freedom and light.

It doesn't mean we owe allegiance,
To a forgotten imperial dream,
We've the stars to show where we're going,
And the old flag to show where we've been.

It's only an old piece of bunting,
It's only an old piece of rag,
But there are thousands who've died for its honour,
And shed of their blood for OUR FLAG.

AUSTRALIAN FLAG MADE BY POWS

<https://www.awm.gov.au/collection/C451664>

Amongst the prisoners of war in Japanese hands were Gunners NX36861 William (Bill) Thomas Palmer and NX36853 William (Bill) Edwin Dircks.

Although the Japanese had surrendered on 15 August 1945, news did not reach the jungle camps until 6.00pm on 18 August 1945. At reveille on the morning of 19 August this flag was flying on a flagpole, complete with yardarms and halyards much to the surprise of the camp and especially the Japanese.

The material the prisoners used for the blue of the flag's ground was taken from the bottom of a Japanese mosquito net, which had a wide band of about 18 inches of blue material around it, the red came from the lining of a Dutch straw hat, blue in the Union Jack was obtained from an army signal flag, which was being used as a patch on a prisoner's shirt, and the white material came from the only known silk handkerchief in the compound. For thread the two men unpicked pieces of canvas from an old army kit bag. The whole of the stitching was done with wire needles, ground to a point at one end, and an eye punched in the other end with a bamboo spike.

The flag was almost finished at about 3.00am, working by improvised lamps using coconut oil when Bill Palmer and a couple of friends decided to spend the remainder of the night in erecting a flag pole made from the largest and straightest piece of bamboo available (about 40 feet long and 6 inches through the butt). Bill Dircks with another couple of friends, continued on with the making of the flag.

OPINION MAKERS By Arnis Luks

A recent addition to our online PDF library includes several titles by Ivor Benson. Of particular interest to us is his title *"The Opinion Makers"*, very timely indeed. Benson has compiled multiple articles during the course of his journalistic career of where he concentrates on censorship and propaganda by the MSM. We can witness this same inordinate bias and censorship by the Main Stream Media in the News reporting of today.

The current news cycle is presenting a barrage of articles about a COVID-19 vaccine, time-lines and choices.

What is lacking from the barrage of the MSM point of view, is the opportunity of discussion towards alternatives

to vaccines to manage immune stimulation vs the coercive powers of governments, industry and the MSM acting in concert by denying the exercise of freedom of choice for other options, and freedom of movement.

The current epidemic of autism spectrum disorder - perhaps as high as one in four of young males, attributed by many medical investigators to the ingredients within vaccines, sees the medical fraternity doing little investigation for causation, - treatment yes a plenty, causation almost nill. Some parents are delaying vaccination to the very last to avoid losing the government bribe-payment, or alternatively forgoing the payment to protect their children from the ingredients thiomersal and formaldehyde. These parents are already aware of the medical/government tyranny. Our prime minister is certainly playing his part for the benefit of the medical fraternity - 'no jab no pay' plus the lockdown.

We really need to go back to the beginning of modern medicine in order to see how profoundly wrong the direction we are going is. Firstly to note that clean water and sanitation – closed drainage to treatment plants or to sea, were introduced into developed countries from the 1950s on. The importance of this is seen 'in reverse' when you consider that during a period of extended flooding, the rapid onset of disease where the sewers have backed up into the streets, combined with the limited supplies of readily available clean water.

Towards Medical Monopoly

In 1863 John D Rockefeller travelled to China to market the hydrocarbon product 'kerosene'. While there he established the "Peking Union Medical College." http://www.chinadaily.com.cn/china/2017-03/21/content_28629866.htm

Rockefeller was a monopolist and by establishing a medical training facility with the purpose of training the doctors of the future to market products created from the same industry he held a vested interest with which caused a narrowing of institutional education options available to 'manage health' in China from that time onwards.

An objective of most marketing campaigns is to increase market share. This makes sense if the sole objective is to make profits. If the objective is to provide permanent solutions (to maintain health and vitality), then this may produce an entirely different set of options.

To treat the symptoms of a common cold under the discipline of increasing market share, requires an ever-expanding plethora of products, each relieving different symptoms. To provide a permanent solution against the common cold may require a seasonal diet of garlic, honey, onion and 'high content vitamin A, D & C vegetables and fruits - of naturally occurring antibiotics and antioxidants, under an umbrella of regular outside activities - fresh air, sunshine and exposure to a wide variety of micro-flora.

You can see from the different methods for treatment entirely different marketing strategies. The first

requiring significant psychological manipulation, with counter-marketing against any alternative methods. The other - self managed health, requires a trip to the local greengrocer to make some sensible selections and ensuring time spent outdoors in the natural environment.

Community Diversity

Many and varied solutions are important to counter any dominating bias. The more varied the options available, the greater chance each person can find a solution that suits themselves. With only one option available or promoted, a significant vitality is removed from the community. Societal thinking will stagnate (dumbed down) at that point and take what it can get.

Classical Education and Action

The discipline of grammar, logic and rhetoric has been used from antiquity to approach any subject for learning. Health is no different. The voices of the herbalist, naturopath or dietician are given no airworthiness under the censorship of the MSM. Yet each of these disciplines provides historically and scientifically substantiated methods to manage health and vitality.

In regard to a realistic discussion around COVID-19 we can place this same template of classical educational and thought. Should the vaccine promoters be the only voice within the discussions and headlines of the MSM? Or should there be a variety of input from many sources so that an informed public - point and counterpoint - can make lifestyle choices that suit themselves?

It is that simple and really important to maintain the vitality of a community by listening to other diverse points of view. The vested interest of Bill Gates and Antony Fauci, the IMF and World Bank is only the monopolist's point of view. Whereas the old country town GP may suggest playing in the dirt (garden) to stimulate the immune system and a little more exercise.

Towards NEWS Monopoly

Google, Facebook, Twitter and Apple appear to be all working in concert to stifle alternative political points of view - that evil Donald Trump! The fact is the MSM has been campaigning against him from before the 2016 election onwards. The MSM is again presenting only one point of view. They are doing their darnedest to shut down all alternative discussion and News, especially evidence coming into the courts of the election fraud.

The MSM kept this story buried for weeks until forced to finally publish minimal reports, but have now killed it again by the exaggeration of the demonstration in Washington Capitol Hill and the fiasco of impeachment.

Google is admitting they are trying different algorithms to filter-out News and information coming from within Australia. YouTube is placing MSM News services in the searches (no matter what the search subject) that I have recently performed. Twitter and Facebook are shutting down (alternative viewpoint) accounts. Apple is threatening to de-platform alternative Social Media software. The MSM is performing a

deliberate act of totalitarian censorship.

Humbug

With every action comes the potential for an equal and opposite reaction. The pure humbug, illustrated at the Australian tennis open, one player testing positive being allowed through while all the thousands upon thousands of crowds must maintain COVID restrictions. The Victorian government is also considering allowing foreign students back in. The financial pain is great, but the colonising of Australia through the universities is significantly hampered during the lockstep/lockdown.

To compound this failure of considered opinion, business leaders are calling for clear direction from the self-appointed national cabinet in regard to adherence to a vaccination schedule of employers towards their hirelings. The OHS&W Acts of the various states, places significant liability against every employer if they fail to provide a safe working environment. This could be argued, that if an employer fails to enforce vaccination schedule compliance, they are failing to provide a safe working environment. A case of circular argument to circumvent our 'limiting' constitution.

<https://www.theaustralian.com.au/nation/politics/coronavirus-bosses-want-clarity-on-staff-jab-rules/news-story/3555e5f26ec98a3547b441d641706579>

No government has the authority to compel medical procedures upon an individual. There is an expectation that infectious individuals would be isolated. All others should be free to go about their daily business.

In one of Aesop's fables - the wolf and the lamb - is a very important lesson that the tyrant can always find an excuse for his tyranny. Also, that the unjust will not listen to any alternative reasoning. The Greek slave Aesop lived between 620 and 560 BC. Here we are nearly 2600 years later learning the same lesson - again.

Alternatives Options Must Be Sourced

With the deliberate censorship by the MSM, alternatives must be utilised at every opportunity. Any thought of a "letter to the editor" could now be redirected to your local politician or another individual who may be able to exert some influence - the CEO who may be quick to look for enforced vaccination schedule compliance.

A report coming out of Canada shows that one willing politician is well able to voice an alternative viewpoint, provided there is sufficient community support:

https://twitter.com/Roman_Baber

...fear of COVID-19 is exaggerated. 10 months into this exercise, we have clear evidence that lockdowns don't work. Instead, they (have) caused a catastrophic toll on children, health, mental health, economy and wellness. They must end. The best thing we can do for the health of Ontarians is to protect Long Term Care and the very vulnerable, build additional hospital capacity (if needed) and allow Ontarians to resume life. Our detractors will call us names and accuse us of misinformation - that's all they've got and it's

getting old. The record shows that Public Health restrictions have not been effective... Let's insist on a public conversation, supported by facts and fair medical narrative. There are ample doctors, nurses, scientists, teachers and everyday people whose opinion on COVID-19 response falls outside Groupthink. To deny expression of any well founded opinion is anti-scientific...

The Canadians are demonstrating a truth - that politicians yield to sufficient pressure. The MSM have turned nearly all politicians into a quivering rabble, terrified their future political prospects will vapourise if they take an alternative point of view on COVID policy. Politicians need your determined support to stand against this medical tyranny (reinforced by the MSM) - to stand out from the crowd.

The Crowd

The biblical story of 'the crowd' of Palm Sunday being the same crowd that condemned 'the Christ' to be crucified a few days later, shows the inordinate pressure exerted by peer groups. Peter's denial is discussed in detail in Rene Gerard's video here: <https://www.youtube.com/watch?v=YWsU5rXDFVc> ...highlights this great human frailty, that Peter, who was in the very presence of 'the Christ' and willing to follow Him to the cross, failed three times in his denials before 'the crowd'. Peter first saw 'the risen Christ' and left the nets to sprint up to Him knowing he was already forgiven - 'feed my sheep'. (See Gustave Le Bon 1896 "*The Crowd*" - a study of the popular mind, available in our online library)

The archetypal failure to recognise how 'the crowd' can be easily manipulated and deeply wrong cannot be more significantly illustrated than the acquiescing of the crowd for the crucifixion of the Saviour of the World.

We must individually choose to stand away from the crowd and deeply consider the ramifications of what we are acquiescing for the sake of ourselves and future generations. This is a pivotal point, a 'yes' or a 'no' for the continuation of this civilisation. A regeneration of our culture is still possible by the resistance to tyranny and a resurgence of civil / political energy towards limiting government, limiting industry, limiting media and especially the inordinate power exerted by finance overarching all these other things, with the introduction of a fair and equitable distribution system - Douglas Social Credit, a policy of the philosophy of Christianity.

Individual Initiative to Drive The Narrative

The information provided within every issue of *On Target* has sufficient material (with references) that can be transposed into letter writing and pamphleteering campaign material for further distribution.

For those with internet access, there is ample opportunity for 'comment' on various web sites. Never let an opportunity go by to spread the word: of real alternatives and options to exercise freedom of choice - to be the salt of the earth who has not lost is savour.

Primary Function of Politicians

Every politician must be encouraged to exercise their primary functions which are: to represent the electorate in the Parliament, and to hold the Executive to account in the Parliament.

The national cabinet does not exist in our constitution, and has never existed prior to 2020. There is no Hansard recording of debate, nor the historical precedent of Federal Cabinet files being released in 20 years time.

It is an entirely false arrangement - a seizing of power imposed onto a confused and disorientated public.

We are one year into this lockstep/lockdown and must understand that upholding the Constitution, insisting on the enforcement of our ancient Common-Law Rights, the ability to exercise freedom of choice including medical choices, are all integral to a restoration towards stable society - the way back to freedom with responsibility. Politicians must be given no quarter to worm their way out of their duty to return responsible government back to the Constitution and our ancient Common-Law Rights.

Those were the days - A Bit of Australian Nostalgia

My mum used to cut chicken, chop eggs and spread butter on bread on the same cutting board with the same knife and no bleach, but we didn't seem to get food poisoning. Our school sandwiches were wrapped in wax paper in a brown paper bag, not in ice pack coolers, but I can't remember getting E. coli.

Almost all of us would have rather gone swimming in the creek, the lake or at the beach instead of a pristine chlorinated pool (talk about boring), no beach closures then either?

We all took PE . And risked permanent injury with a pair of Dunlop sand-shoes or bare feet if you couldn't afford the runners instead of having cross-training athletic shoes with air cushion soles and built-in light reflectors that cost as much as a small car. I can't recall any injuries but they must have happened because they tell us how much safer we are now.

We got the cane or the strap for doing something wrong at school. They used to call it discipline yet we all grew up to accept the rules and to honour and respect those older than us.

We had at least 40 kids in our class and somehow we all learned to read and write, do maths and spell almost all the words needed to write a grammatically correct letter....., FUNNY THAT!!

We all said prayers in school irrespective of our religion, sang the national anthem and saluted the Flag and no one got upset. Staying in detention after school netted us all sorts of negative attention we wish we hadn't got. And we all knew we had to accomplish something before we were allowed to be proud of ourselves.

I just can't recall how bored we were without computers, Play Station, Nintendo, X-box or 270 digital TV cable stations. We weren't!! Don't even mention about the rope swing into the river or climbing trees.

Oh yeah ... And where were the antibiotics and sterilisation kit when I got that bee sting? I could have been killed!

We played "King of the Castle" on piles of dirt or gravel left on vacant building sites and when we got hurt, mum pulled out the 2/6d bottle of iodine and then we got our backside spanked. Now it's a trip to the emergency room, followed by a 10 day dose of antibiotics and then mum calls the lawyer to sue the contractor for leaving a horribly vicious pile of gravel where it was such a threat.

To top it off, not a single person I knew had ever been told that they were from a dysfunctional family. How could we possibly have known that?

We never needed to get into group therapy and/or anger management classes. We were obviously so duped by so many societal ills, that we didn't even notice that the entire country wasn't taking Prozac!

BUGGER ME!!

TRAINING

It is most important to develop your thinking to be effective in the political realm. A Social Credit training course will be held in **Adelaide, SA 20th February 2021**. This course will help to establish a firm foundation to move forward. **Please mark the date in your diary.**

Personal attendance, even across the internet, is really important to view the presentation and follow up questions to consolidate this opportunity for learning.

Further attendance details will be confirmed closer to the day. The training will be recorded and available later through DVDs, USBs and the internet, so all will have an opportunity to train.
