Destroying Bees to Save The Bees	3

Thought for The Week: May 27, 2021 Canadian News Services carried front page headlines ‘using Ground Penetrating Radar’ of mass graves identified as 215 indigenous children ‘found’ on a former school grounds in Canada. These headlines were repeated around the world. This massive psyop caused acts of violence against churches, some being burnt to the ground. Public demonstrations were held paying tribute to the children whose remains were ‘discovered.’ Within days of the announcement, Canadian Prime Minister Justin Trudeau declared that all flags on federal buildings fly at half-mast. ‘Canada Day’ was almost cancelled.

May 28, 2022, one year later, a few News Services declared this same story ‘fake and debunked by academics’.

July 14, 2022 a Canadian News Service reports that numerous archaeological digs have been conducted across this same site since the 1950s. No human remains have ever been found even though this area is of archaeological significance. The original report suggesting 215 mass graves has been shown to be a complete fabrication by an academic and repeated around the world by major News Services. The psychological imposition of guilt imposed towards all Canadians achieved its purpose, with no counter apology from the academic, the News Services, nor the Canadian Prime Minister. The MSM have also failed to report on this ‘debunking of the genocide narrative’.

THE REAL STORY By Arnis Luks

The *Introduction* of Alan Frost’s ‘*Botany Bay and the First Fleet: The Real Story*’, contains the following: ‘As I mentioned earlier, in the course of my research over the past 35 years, as against the hundred or so documents printed in *Historical Records of New South Wales*, I have gathered some 2500 documents relating to the decision to colonise New South Wales and the mounting of the First Fleet. It is inevitable that historical analysis based on such a vastly expanded record will differ very significantly from that based on the old, fragmentary one. The real story of the Botany Bay decision is much more complex than the explanation that has prevailed for 200 years. It is also much more interesting. Australians deserve to know it...’ ...end

The many other events from the Australian historical record across the past 200 years also show this same gross fabrication, generally by academics within our elite tertiary institutions and repeated through all lower educational institutions, seminaries and News Services. You won’t find the true story unless you personally take the trouble to search it out and read books by the Alan Frost’s, Geoffrey Blainey’s and Keith Windshuttle’s of this world.

Is There a Medical Emergency?

https://rwmalonemd.substack.com/p/july-16-2022-is-there-a-medical-emergency?utm_source=email

Senator Rand Paul has accused Dr. Fauci and the White House (which is captured by the Health and Human Services HHS Administrative State) of ‘emotionalism and sensationalism’ leading up to the renewal of the determination of a continuing medical emergency attributable to COVID-19 disease and SARS-CoV-2 infection. Is this medical emergency justified, or does it reflect yet more mis- dis- and mal-information from the HHS Administrative state acting in coordination with corporate media to propagate Fearporn to justify the continuing suspension of medical ethics, normal regulatory processes, replaced by censorship and the orgy of war profiteering by the medical-pharmaceutical industrial-complex?

A Run of Incompetents: Boris Johnson, Scott Morrison, Joe Biden, Jacinda Ardern, Justin Trudeau

With the resignation of Boris Johnson as Prime Minister of Great Britain, comes the observation that our learning institutions, political representatives and bureaucracy present themselves as incompetent, incapable of dealing with modern issues - issues that appear unresolvable at a national level and require the intervention of a world

authority or world government. The abandonment of reason within the leadership class is deliberate policy. Increased levels of public anxiety yearn for relief from this psychological manipulation or fearporn. But no relief will be forthcoming except for world government with a central bank digital currency. This theme caused me to look up 'The Protocols', in particular Protocol 10:17, 18, 19. A PDF version is available online in 'actionist corner'.

PROTOCOL No. 10 ...

WE SHALL DESTROY

17. By such measure we shall obtain the power of destroying little by little, step by step, all that at the outset when we enter on our rights, we are compelled to introduce into the constitutions of States to prepare for the transition to an imperceptible abolition of every kind of constitution, and then the time is come to turn every form of government into OUR DESPOTISM.

18. The recognition of our despot may also come before the destruction of the constitution; the moment for this recognition will come when the peoples, utterly wearied by the irregularities and incompetence - a matter which we shall arrange for - of their rulers, will clamour: 'Away with them and give us one king over all the earth who will unite us and annihilate the causes of disorders - frontiers, nationalities, religions, State debts - who will give us peace and quiet which we cannot find under our rulers and representatives.'

19. But you yourselves perfectly well know that TO PRODUCE THE POSSIBILITY OF THE EXPRESSION OF SUCH WISHES BY ALL THE NATIONS IT IS INDISPENSABLE TO TROUBLE IN ALL COUNTRIES THE PEOPLE'S RELATIONS WITH THEIR GOVERNMENTS SO AS TO UTTERLY EXHAUST HUMANITY WITH DISSENSION, HATRED, STRUGGLE, ENVY AND EVEN BY THE USE OF TORTURE, BY STARVATION, BY THE INOCULATION OF DISEASES, BY WANT, SO THAT THE 'GOYIM' SEE NO OTHER ISSUE THAN TO TAKE REFUGE IN OUR COMPLETE SOVEREIGNTY IN MONEY AND IN ALL ELSE. ...end

Destroying Families To Save Families

Plan to end family violence must reflect Indigenous, LGBTQ, and children's experiences :: Social Services Minister Amanda Rishworth has released a long-awaited consultation report (commissioned by the former liberal government) into family and domestic violence.

<https://www.smh.com.au/politics/federal/plan-to-end-family-violence-must-reflect-indigenous-lgbtq-and-children-s-experiences-20220714-p5b1i9.html>

<https://ncwa.org.au/wp-content/uploads/Draft-National-Plan-to-End-Violence-against-Women-and-Children-2022-32.pdf>

...Fitz-Gibbon said the findings of the report, which was handed to the federal government last year and finalised in February 2022 but not previously released, had been reflected in the draft national plan circulated earlier this year...The consultation report, commissioned by the former Morrison government,

was developed to inform the new 2022-2032 National Plan to End Violence against Women and Children, which will come into effect this year once States, Territories and the Commonwealth jointly sign off on it. The current plan ended in June. Women's ministers are meeting in Adelaide next Friday (15th July) to discuss progressing the plan... The Coalition released the draft national plan in mid-January but did not publish the consultation stakeholder report nor another separate consultation report with victim-survivors. It released the latter before the election after survivors complained that their voices were being silenced, but it sat on the stakeholder report...end

AJL... Amanda Rishworth was introducing herself at the nearby polling booth last federal election. After reading this article, with Amanda as minister responsible for this '**10 year plan**' into family and domestic violence, I immediately thought back to Alexandra Kollontai.

In 1917, Alexandra Kollontai, the first female commissar of the Soviet worker's council set about the sexual-political destruction of the family. However, even Lenin had to repeal the agenda — to the frustration of Western communists like Wilhelm Reich — because it caused social chaos that stood in the way of creating his socialist utopia.

Australia, regardless of governmental flavour, is continuing to implement tried and failed Soviet policy. In a form of collective suicide, we expect to achieve a differing result than the Soviets experienced only 100 years ago. Amanda, as a good little Soviet, is following this historical model with an indifference towards any policy that may stabilise our culture and protect the basic unit of society - the traditional family – father, mother and children. She, as minister responsible for this policy, is destroying families to save families.

The Global Sexual Revolution – Destruction of Freedom in the Name of Freedom

Gabriele Kuby is a German sociologist, book-author and international speaker. Her main issue in this title is the ideology of genderism which undermines the family and democratic liberty. Her latest book, *Die globale sexuelle Revolution – Zerstörung der Freiheit im Namen der Freiheit*, (The Global Sexual Revolution – Destruction of Freedom in the Name of Freedom) has become an instrument of resistance in many countries.

<https://www.amazon.com.au/Global-Sexual-Revolution-Gabriele-Kuby/dp/1621381544>

Inside Cover:: The core of the global cultural revolution is the deliberate confusion of sexual norms. It is the culmination of a metaphysical revolution as well — a shifting of the fundamental ground upon which we stand and build a culture, even a civilization. Instead of desire being subjected to natural, social, moral, and transcendent orders, the identity of man and woman is dissolved, and free rein given to the maximum fulfilment of polymorphous urges, with no ultimate purpose or meaning. Gabriele Kuby surveys gender ideology and LGBT demands, the devastating effects of pornography and sex-education, attacks on freedom of speech and

religion, the corruption of language, and much more. From the movement's trailblazers to the *post-Obergefell landscape, she documents in meticulous detail how the tentacles of a budding totalitarian regime are slowly gripping the world in an insidious stranglehold. Here on full display are the re-education techniques of the new permanent revolution, which has migrated from politics and economics to sex. Kuby's courageous work is a call to action for all well-meaning people to redouble their efforts to preserve freedom of religion, freedom of speech, and in particular the freedom of parents to educate their children according to their own beliefs, so that the family may endure as the foundation upon which any healthy society is built. * Same sex marriage ***

Real Solutions from Sen Jacinta Nampijinpa Price

On July 1 – Territory Day – my term as Senator for the Northern Territory officially began, and already I'm dealing with the left's woke nonsense. Rather than focus on solutions for the REAL issues, our new government is more concerned with their own virtue signalling.

Let me make this one clear for the Adam Bandts and Anthony Albaneses of the world: just because someone is Indigenous does not automatically make them marginalised. I'm tired of the paternalistic and condescending narrative that says that by virtue of lineage, Indigenous Australians are somehow in need of help and incapable of success without the aid of some privileged inner-city lefty.

Simply having Indigenous heritage doesn't automatically make someone disadvantaged.

In Australia we have a growing Indigenous middle class, successful people lucky enough to have the advantage of the generous education system, services and employment opportunities that our great nation has to offer ALL Australians. They've done that WITHOUT a constitutional Indigenous "voice" to parliament, they've done it WITHOUT a treaty, and they've done it WITHOUT any need for some hero-complex lefty's virtue signalling. I've said it before and I'll say it again – a constitutional "voice" to parliament is redundant. The Australian people have freely elected TEN Indigenous Australians to Federal Parliament. According to the recent census, Indigenous Australians account for 3.2 per cent of the population – they now make up 4.5 per cent of the Australian Federal Parliament.

You don't need a constitutionally mandated representation for a group overrepresented in Parliament. Yes, many of the most marginalised in our country are Aboriginal, but the "gap" is not only between Indigenous and non-Indigenous Australians.

It lies between successful Aboriginals and marginalised Aboriginals just as much as it does between successful and marginalised people of ALL backgrounds.

It lies in the more remote Indigenous communities where our nation's most disadvantaged live, not in the

big cities. Out there they're not concerned with virtue signalling or flag waving, they don't need smoking ceremonies or acknowledgments of country.

In those communities where English is not the primary language spoken, where education is not adequate, where jobs are limited and welfare is rife, that's where the gap is the widest. And you don't need a new "voice" to parliament to tell you that.

There are plenty of voices telling us that now, and they're being ignored by the political elite trying to win woke social points.

Instead of making this about race, instead of virtue signalling for political gain, we need to focus our efforts on the REAL problems, with REAL solutions to improve the lives of marginalised Australians – no matter their background.

We should be focussing on ensuring that ALL Australian children can adequately read, write and speak English to gain an education that leads to employment. I don't know how many times I need to call on Australian leaders to focus on the REAL problems, but I'll continue to do so until they listen – because we need them now.

Yours for REAL solutions, *Jacinta Nampijinpa Price*
Country Liberal Senator-Elect for NT ***

Destroying Bees to Save The Bees

I could not let these articles go without further comment.

<https://www.agweek.com/news/businesses-educate-future-beekeepers>

<https://www.science.org/doi/full/10.1126/science.aax9039>

<https://www.abc.net.au/news/science/2020-01-31/>

[honey-bees-insect-colony-collapse-varroa-mite-deformed-wing/11905980](https://www.abc.net.au/news/science/2020-01-31/honey-bees-insect-colony-collapse-varroa-mite-deformed-wing/11905980)

[https://www.abc.net.au/news/rural/2022-06-24/](https://www.abc.net.au/news/rural/2022-06-24/varroa-mite-detected-at-newcastle-port/101180446)

[varroa-mite-detected-at-newcastle-port/101180446](https://www.abc.net.au/news/rural/2022-06-24/varroa-mite-detected-at-newcastle-port/101180446)

The declining health of honeybee colonies in USA was heightened by the arrival of new diseases and pests in the 1980s according to the US Dept of Ag; and in the 1990s the Varroa mite which was introduced from eastern Asia, created more concern as it began to kill colonies.

In 2006, a more mysterious and alarming threat appeared as bee-keepers across the United States reported colony losses of 30 to 90 percent. It was due (*attributed is a better word-ed*) to colony collapse disorder (CCD), a disease defined as a colony that has randomly died except for the queen and immature bees. Researchers have not yet found a cause...some blame large corporations such as Bayer and Monsanto for their use of neonicotinoids, an insecticide used to control various pests, a charge the corporations deny. Bayer CropScience produces some of the most widely used neonicotinoids in the world and considers them safe. Monsanto, the world's largest seed producer, uses Bayer's neonicotinoids on some of its seeds. Monsanto is known for its herbicide 'Roundup' and its genetically modified seeds that are resistant to it.

(*Bayer is now the sole owner of Monsanto since June 7, 2018-ed*)

No Question of Australia Banning These Substances

In 2013, the European Union banned the use of three types of neonicotinoids after several studies linked the insecticide to honeybee colony collapse.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3495159/>

Today, two-thirds of the world's crops are exposed to neonicotinoids, including 90 percent of corn and 60 percent of soybean acres.

A Genetically Modified Bee-Gut-Organism has been developed in January 2020.

<https://genewhisperer.com/2020/03/04/genetically-engineered-honey-bee-gut-microbiome-knocks-down-two-major-environmental-threats-to-bees/>

A GMO Queen Bee Palace located in Hunter Valley, NSW is in close proximity to the initial outbreak of Varroa Mite, where Researchers have been studying Bee genetics and Varroa Mite control for years (at the Tocal Agricultural Institute) and the outbreak threatens the 'National Honey Bee Genetic Improvement Program'.

<https://www.abc.net.au/news/rural/2022-07-01/varroa-mite-threatens-tocal-ag-college-queen-bee-research/101196944>

In a conflicting report through our ABC News, Varroa mites found in Queensland, which are usually associated with Asian honey bees are less threatening.

<https://www.abc.net.au/news/rural/2022-06-29/native-bees-could-help-mitigate-varroa-mite-impacts-on-orchards/101189080>

Who is right; our Australian Honey Bee Industry Council, or the USA Dept of Ag as to the veracity of these Asian Mite claims? The final-solution appears to be the same - the destruction of the European Bee in preference to the GMO Bee - a ready market for a newly licensed product to alleviate a threat. This smells of Wuhan and Fauci to my sensitive nose. *Cui Bono?*

The Varroa Destructor

As a viable and demonstrable alternative solution to the issue of Varroa Mite (with a GMO Bee ready to be run out just in time for our bureaucracy to go about destroying all our hives nation-wide), rather, we utilise a known and proven treatment with Oxalic Acid during the mid-winter period while brood is not present in the hive.

Oxalic Acid Mite Treatment Research,
University of Georgia, USA

<https://www.youtube.com/watch?v=WbqdyufEQNM>

Isn't Big-Ag fortunate to be so prepared for such an event! Aren't our politicians and bureaucrats wonderful for being able to readily assist Big-Ag with their final-solution of a mass cull in preference to all the small bee-keepers around Australia managing their own hives.

New Zealand utilised this same mass cull program of destroying the Bee industry to save the industry based on dubious computer-models; as Britain also did against mad-cow while not managing, nor removing the source of disease. Ever so quick to provide the final-solution.

Bovine spongiform encephalopathy (BSE), is a severe neurological disease in cattle that causes damage to the brain and spinal cord.

Sir Albert Howard, developing his organic farming methods by recycling all agricultural waste products through composting methods, was able to protect his herd from 'Foot and Mouth' across many years in Indore, India. Howard's approach was to ensure his cows, which mingled freely with diseased cattle through the fence, even licking inside each others nostrils, were given a proper diet, distributing the products of

composted-manures and other farm waste, that have been recycled through the soil and various flora for cattle food.

Will they give the COVID jab to toddlers?

...from **George Christensen, 'Nation First' Newsletter**

...Data from Australia shows that the most common problem caused by COVID in children is a runny nose, and this was with the more severe Delta strain...

UNICEF also notes the minimal impact on youth, stating that only 0.4 per cent of global COVID deaths occurred in those aged under 20 years. If you extrapolate that figure to the under fives cohort and factor in a decreasing likely(hood) of complications from COVID the younger you are, the reality is it is likely that less than 0.1 %.

Of the 0.4 per cent of people under 20 who died from COVID, UNICEF notes that the "evidence thus far does not point to any increase in child and youth mortality related to the COVID-19 pandemic". This shows that COVID deaths in children, while tragic, were likely the result of underlying health issues that could have led to the death of those children if they were confronted with influenza or some other common ailment.

While an article on World Bank Blogs reported that there had been an increase in mortality in the under 5s cohort, they also stated that the increase in deaths was not from COVID "but from the disruptions in food and medicine deliveries, closed health clinics, and delays in childhood immunizations resulting from the measures implemented by countries to reduce the spread of the virus." In other words, **lockdowns caused the excess deaths of toddlers, not the virus.**

A recent study has revealed that teenagers are four to six times more likely to get 'vaccine'-related myocarditis than end up in hospital with COVID, with an estimated risk of myocarditis of 162.2 and 13.4 cases per million and for healthy boys aged 12 to 15 respectively. But what do we know of the impact of the mRNA jabs on children under five?...
