## THE DEEP END OF THE POOL – THE BREAK-UP OF AUSTRALIA

By Arnis Luks

The *Times of Israel* reported on 29 October 2023, which was day 24 of the incursion into the West Bank of Gaza, that "Amid ongoing war, BP and Eni were among the firms awarded gas exploration licenses off the Mediterranean Coast". <https://archive.md/NUOaN#selection-228.5-823.15>

During the haze of war, strategic manoeuvring occurs away from the public view. This intrusion into the vast mineral reserves is occurring in the disputed waters off the Gaza coastline, where the reserves legally and otherwise belong to the nation of Palestine. This pursuit of policy is simply international piracy by the Zionist controlled State of Israel.

<https://www.voanews.com/a/eu-egypt-israel-agree-to-export-israeli-liquefied-natural-gas-to-europe/6618920.html>

The above linked news item from June 15, 2022, referring to 'exporting of Israeli liquefied natural gas LNG to Europe occurring just a few months prior to the destruction of the two Nord Stream pipelines September 2022, shows a clearly defined benefit of market-advantage for the Zionist controlled State of Israel over the Russian exports of LNG to Europe. As CH Douglas never tired of saying 'war is simply policy pursued by other means'.

The current destruction and displacement of the Palestinian people, apart from purging them from their traditional homeland of past millennia, is also to consolidate exploitation of these most lucrative mineral reserves off the coast of Gaza. The nation of Palestine, and others are being robbed blind by the Zionist controlled State of Israel while militarily and logistically supported by both UK and USA, to now include Australian's own military personnel as well. This pursuit of policy objectives could lead directly into World War III and Australia is already in the thick of it without any consultation with the people, nor parliamentary resolution nor debate.

*"U.S. military forces—together with the United Kingdom and with support from Australia, Bahrain, Canada, and the Netherlands—successfully conducted strikes against a number of targets in Yemen used by Houthi rebels to endanger freedom of navigation in one of the world's most vital waterways,"* Mr. Biden said.

<https://www.theepochtimes.com/world/australian-troops-involved-in-strikes-on-houthi-rebels-in-yemen-biden-confirms-5563853>

This alignment of several (USA/Zionist/UK) national powers (now including Australia) of pursuing this mineral exploitation, is the prelude to a greater Middle Eastern military escalation. Australia's immigration policy is not helping the situation at all, but rather building on to these seeds of discontent leading directly to significant civil disruption. The chickens from a long-standing bipartisan immigration policy are now coming home to roost. Just remember this when you look so fondly towards those political parties and the not so insignificant part they each (in concert) played in the treachery and now final breakup of Australia.

### The Same Policy Occurring In Australia

Former MP George Christensen, in this telling article of the silent takeover of Australia by Communist China, here: <https://nationfirst.substack.com/p/could-australia-become-a-colony-of> lists the massive expansion of the purchasing of Australia's national assets by Chinese interests (but fails to make mention of the leasing for 99 years of the Port of Darwin to China under the Australian Liberal Party). While PHON are directly linked to these reported observations from George, which are much appreciated, they, the PHON party openly advocates continued support for the Liberal/National Coalition as the preferred government. This dialectical argument of the political left and right, supposedly as antagonistic, continues in and out of Parliament, with no change of effective political policy nor strategy. *'Join the party and you can help sort it out from the inside'* is all we ever hear, with no effective and lasting change of policy from any of them. The parties are rotten to the core, and we will find no relief from these un-Australian policies while they continue to hold court and control of our parliaments.

***This country will not be saved from the top. The rot is too deep. It will only be saved by the grass roots - EDB***

We continue the same merry-dialectical-road to our own national obliteration. We need to do something very different if we are to achieve effective and lasting political and strategic change. I don't believe the political party system can be redeemed. We must regain our own initiative within each and every local community to control their own political representative. This cannot be achieved while we sit on our hands and do close to nothing. It must come from within; that each person makes it their own business to personally train, to re-educate, to ensure they are adequately informed, to enter the necessary open-and-public discussions of where we are to go and what we want to achieve as a community. Firstly, at the local level, and then moving out into other communities, to work together to achieve a region by region, state by state approach, on to achieving a National Consensus. This will never occur while we sit in the bleachers and rely on others to do the necessary hard yards of what we must do ourselves.

Yes, George is partly at fault, but not entirely. He cannot survive a political minute trying to challenge this policy while all political persuasions are collaborating against him - without full community participation and backing that must come from within each person acting in concert with others to achieve a legitimate goal of restoring ownership of Australia to ONLY Australians. Even the longest road begins with the first step (back to freedom with responsibility in a moral environment).

### **The Great Handover, In Spite of the Failure of The Voice To Parliament**

<https://www.dailymail.co.uk/news/article-12953733/How-Western-Australia-hand-close-10-cent-state-Aboriginal-communities.html>

*How Western Australia will hand 'close to 10 per cent of the state over to Aboriginal Communities'*

*By Stephen Gibbs for 'Daily Mail' Australia*

*Control of almost 10 per cent of Western Australia would be transferred to Aboriginal communities under a proposal by the state's Labor government. The plan covers 22 million hectares of land and would provide the opportunity for home ownership in remote Indigenous settlements for the first time. About 8.7 per cent of Western Australia is controlled by a statutory body called the Aboriginal Lands Trust which has managed the land for traditional owners since 1972...*

To build on the handing over of the waterways of Victoria to Aboriginal Corporations, the Western Australia's government is upping-the-ante. The potential carrot appears to be the possibility for some local Aboriginals permitted to own their own homes. I somehow doubt this with the WEF being the managers.

***'you will own nothing and be happy'.***

The final breakup of Australia continues under successive governments regardless of their political persuasion.

### **Regenerating Australia – One Person At A Time**

Jeremy Lee, with the help of others, produced the training package called Freedom Potentials. A Podcast from the Inverell Forum some years ago of his [Introduction to the Freedom Potentials Training Package](https://alor.org/Storage/MP3/PodCasts/Freedom_Potentials/Introduction.mp3) is available here: [https://alor.org/Storage/MP3/PodCasts/Freedom\\_Potentials/Introduction.mp3](https://alor.org/Storage/MP3/PodCasts/Freedom_Potentials/Introduction.mp3)

Jeremy took this training package around Australia in the hope that some individuals, after receiving their training would become effective actionists to their local areas. I sat in on this course, and yes, it was quite effective to the point, I, amongst others, continued our association with ALOR in any area that suited our particular skill set. But much, much more is now needed and from many, many more.

To resource this growing need of personal Training, the website <https://freedompotentials.org/> has been repurposed, to hold all our current ALOR Training Packages for ease of access, and also provide direct contact with our Trainers through the interactive Blog Format.

Register today, to readily utilise this important Personal Training Resource.

The Freedom Potentials Video Channel has also been established to compliment the website, with, for a start, all the original Freedom Potentials Training Videos being made available on Rumble: <https://rumble.com/c/c-5608962>

### **Regenerating The Great South Land of the Holy Spirit**

Taking this same message out, our ALOR National Director will repeat this exercise of Jeremy's, of taking the Freedom Potentials Training Package into communities as part of the ongoing Kitchen Table Meetings, Social Dynamics Training, and State Seminars, as he again travels around Australia, but this time, suitably accompanied by other Douglas Social Credit Trained Speakers. Plan to hold your own Kitchen Table Meetings (beginning in SA), with the other states soon to follow. In the first instance contact HO with your preferred dates and locations to align with the busy travel schedule. The first meeting will occur in Angaston SA Tuesday Feb 6<sup>th</sup> at 1.00pm. You can build on from this initiative, by firstly holding your own Kitchen Table Meeting. Followed by the one-day Social Dynamics Course, then the two-day Freedom Potentials Course, with further Seminars to follow. There is no shortage of potential for personal initiative towards restoring our ancient Rights and Freedoms.

### **Conservatism Is Not Enough**

After PHON Sen Pauline Hanson raised concerns about Woolworth's no longer providing Australia Day memorabilia, Bunnings has revealed stores are free to choose to celebrate Australia Day however they wish. This rear-guard action by PHON only delays the inevitable. Those revolutionaries tearing our culture apart are unrelenting, believing history is on their side.

The only legitimate counter to this concerted attack

by big money and these revolutionaries is an active, civic-militia, an able-bodied people suitably trained for political service. Desecrating our public libraries with pornography, brainwashing our children through our education institutions, denigrating our significant, cultural achievements, disparaging our civic institutions (having been developed across millennia), all will continue until sufficient people grow a backbone and push-back with the restoration of societal norms.

If our public libraries are desecrated which they are, then sustained political pressure must be applied toward the custodians of those libraries until they permanently relent. When our children are being brainwashed and mind-conditioned with gender ideology and pornography, which they are, then they must be withdrawn from public education and the institution left to atrophy as is right and proper. Whenever we are welcome to our own country, an immediate public response must be forthcoming from every able bodied person until this very modern absurdity is discontinued.

An active, civic-militia is essential to regenerating and rebuilding our society, which has been under constant revolutionary attack since the 1960s. Conservatives and Progressives alike have worked in concert to deconstruct us as a people. Rear-guard actions are insufficient. We must take the initiative and push all the way back to the restoration of societal norms.

The political parties are significantly responsible for this atrocious situation. They have worked in concert - together to bring this about. The political party system is rotten to the core, as Eric Butler never tired of repeating. Jeremy Lee's audiotape of the Introduction to the Freedom Potentials Training Package illustrates this with many, many examples of supposedly good people going to these hallways of power and turning rotten in a heartbeat.

Putting our misguided faith in another individual to do all-the-work-for-us is also insufficient. Yes, we must put our faith in individuals, but only as the complimentary part of **'working in concert'** to rebuild this great Southland of the Holy Spirit. We personally cannot abrogate the responsibility of this life onto someone else, while we sip our café latte's or swill our beer while we turn on our TV or social media. Australia is going to hell on a highway and every able-bodied person must do their civic duty until our ancient rights and freedoms are permanently restored, that land tenure is secured for all, and that all of Australia will not be given away to the highest bidder.

The likes of Clive Palmer, Twiggy Forrest and Gina Rinehart have their own duty to perform.

#### ***'from whom much is given much is required'***

Neoliberalism and Libertarianism are both selfish and self-obsessed ideologies. They offer nothing of resolution from the cultural situation Australia is in. As Jeremy and Eric both said, those individuals who are prepared to

***'give it their all'*** are the only ones who will eventually save Australia.

Opposition leader Peter Dutton is constantly under attack from within his own political party. The progressives are pushing for climate targets while our national primary and secondary industries are being decimated. These progressives are doing the bidding for the New World Order, owned, and controlled by financial powers. They are not interested in climate, nor the environmental vandalism that electric cars, solar, batteries and wind lemons are all creating. The progressives are only interested in deconstructing the nation of Australia so that it is available for monopoly-capitalist exploitation, which it is.

The Glorious Revolution of 1688 occurred because the British elites were in bed with the Dutch merchants and bankers. The Dutch led invasion was never resisted by the Admirals of the British fleet, nor the Generals controlling the British armies. The King was left to fend on his own. Those elites were white-anted well before the invasion, softened up and lined up like lemmings. Australia is heading into a similar fate while our own elites are doing the same as occurred to Britain back then. We must learn from this vital lesson from history, or we will repeat the same mistake and offer our progeny no other future than totalitarian-financial slavery.

These URL linked articles all lead onto further financial hardship and eventual destitution. This is the policy of the Klaus Schwab's statement *'you will own nothing'*... As Jeremy said in his audio tape, ***'Australians were more united during the depression than they are today'***. They knew what the problem was (finance – poverty amidst plenty) and where it was coming from (central bank policy). We do not, because we haven't made the necessary personal effort to be informed and educated, to find out for ourselves. Or worse still, are attempting to opt out through some type of ***'personal or family trust'*** or ***'bugout'*** arrangement. This is where we really are in time and space, and from where we must rebuild, or all is lost for generations to come. We must come together and work towards a better arrangement of decentralised political power, vested as closely as possible to the individual. We don't need revolution, but rather ***devolution***, power divested to a lower order body.

While this *OnTarget* has a stark and foreboding message, all is not lost, provided sufficient individuals put their own shoulder to the yoke of 'freedom with responsibility in a moral environment'. The Training is there to be received. The initiative lays with every individual to help themselves. The politicians can do nothing of themselves until an active, informed and suitably trained citizenry fully participates in the political arena of ideas to restore our ancient rights and freedoms.

Do you carry a copy of your Constitution in your top shirt pocket or handbag? This is where it belongs, always at the ready, to uphold the agreed and defined 'limiting powers' handed over to the Commonwealth Government as to how we shall be governed. It is to our Constitution we must turn; under those most prophetic words '*Humbly relying on the Blessing of Almighty God*'.

At the commencement of hostilities of WWII, the ACP Australian Communist Party-controlled maritime unions deliberately hamstrung our war effort through industrial action - sabotage. That is, until Germany attacked the Soviet Union, then the policy was immediately reversed. The original policy was to support the Soviet Union although given under various misleading justifications, and then countered unapologetically towards supporting the war effort of Australian service personnel once the Soviet Union became our ally against Germany.

The current round of union action is to further build on the WEF efforts to bring about world government by creating greater industrial and societal chaos. You see, this is the nexus, the coming together of common policy between both Communism and super-Capitalism being fully exposed.

Both these headlines reinforce the difficulties any opposition party or individual will face challenging the existing government. The increasing totalitarian grip of supposedly democratic nations is occurring in rapid time. We are entering the age of dictatorship. The Australian situation is no different, except the bipartisan approach of all political parties discreetly collaborating doesn't appear so readily their totalitarian grip. With massive MSM support, their carefully scripted narrative ensures this collusive consideration is never given the light of day.

Without his billions behind him, Donald Trump would find it financially impossible to fend off this unending and deliberate litigious campaign against him finding any pathway to the USA presidency. The politically appointed judiciary have equally demonstrated their political bias in Australia with the significant High Court decisions leading onto centralised world tyranny - Franklin Dam, Mabo, Wik and many other decisions that directly affected our Federation and the balancing of divided-powers across the Commonwealth and the States.

Without a thorough understanding of the development of our Constitution and the balancing of divided-powers across the Commonwealth and the States, a misinformed or uninformed public is putty in the hands of the one worlders' manipulative hands. Our learning institutions have deliberately dumbed us down on this vital civic knowledge from the early 1960s to today. Much is to be done, and the longest road back begins with the first steps. The material is there. Pray the spirit is willing.

Some communities are already meeting at least once weekly, if not twice weekly to enter as they can into the fray. As a first, contact our HO to book your own Kitchen Table Meeting as soon as possible if not today, while the present time is beckoning us to act decisively. \*\*\*
