THE ENEMY WITHIN
RUSHING US TO DESTRUCTION
WAR MINISTER WOULD FRIGHTEN US "OUT OF OUR WITS"

A FEW years ago Mr. Baldwin one morning informed a "hushed House" that it had been "decided" to reduce the Navy by one-third. This had been a declared policy.

The Prime Minister, Mr. Samuel, said: "The enemy with in Europe is far worse than it was in 1914." No, they are measures to protect the police in anti-gas measures. But let none of our readers imagine that this is, with any members of our terrible police force.

"It is the duty of those in authority to frighten the people of this country out of their wits."

A few weeks ago it was decided to instruct the police in acid-gas measures. But let none of our readers imagine that this step was taken with a view to protecting the unfortunate civilian victims of future gas attacks. No, they are measures to protect the people themselves.

A Teasable Design

The entire scheme is obviously vulnerable by design. The Money Monopoly has deliberately restricted the agriculture of our homeland, having a deeper, unlimited, dependance on food from overseas; it has forced our Navy from coal to oil fuel, scrapping our Navy from coal to oil fuel, scrapping our Navy from coal to oil fuel, scrapping our Navy from coal to oil fuel, scrapping our Navy from coal to oil fuel, scrapping our Navy from coal to oil fuel, scrapping our Navy from coal to oil fuel, scrapping our Navy from coal to oil fuel.

The same power has made every bank not reserveable, having more reserves than necessary in order to make it more difficult for the people to purchase gold. The bankers had declared economy. This action of the Cunliffe Committee was within the power of the Wm. on htm.

"We warn all we can reach; the enemy is within, and this enemy by making it financially impossible for our own people to purchase all we can produce, by its centralised power and policy of planned scarcity and destruction, is rushes the country into war, simultaneously render us vulnerable at every point, by weakening not only our mechanical defence services but by reducing our manufacturing capacity through the imposition of malnutrition on a mass scale in the midst of a glut of the greatest plenty of food and wealth the world has ever known."

Note the Dates

Speaking at an Annual Meeting of the Union Bank of Scotland in May, 1930, Lord Home said: "We warn all we can reach; the enemy is within, and this enemy by making it financially impossible for our own people to purchase all we can produce, by its centralised power and policy of planned scarcity and destruction, is rushing the country into war, simultaneously render us vulnerable at every point, by weakening not only our mechanical defence services but by reducing our manufacturing capacity through the imposition of malnutrition on a mass scale in the midst of a glut of the greatest plenty of food and wealth the world has ever known."

The Prime Minister in reply to a question in Parliament (Hansard, September 13, 1931) as to whether or not some concessions should be made to the unemployed said: "The handling of the unemployment case was necessitated by special conditions of borrowing." (Our italics.)

"There is evidence! Now we are being told by Mr. Duff Cooper, the War Minister, that "it is the duty of those in authority to frighten people"!"

The rule of fear and war! Who and what frightens Mr. Duff Cooper?

We warn all we can reach; the enemy is within, and this enemy by making it financially impossible for our own people to purchase all we can produce, by its centralised power and policy of planned scarcity and destruction, is rushing the country into war, simultaneously render us vulnerable at every point, by weakening not only our mechanical defence services but by reducing our manufacturing capacity through the imposition of malnutrition on a mass scale in the midst of a glut of the greatest plenty of food and wealth the world has ever known.

Slander the Destitute  

Since the publication of Sir John Orr's book, the display of profits of income tax on maltreatment was startlingly exposed, there has been a state of apathy and speech which has even led to a secret central inquiry, to the effect that poverty and maladministration are due not to a shortage of purchasing power in the criticised consumers' purses, but to the destitution in the only right way of sorting.

Thus the harassed housewife whose income may be less than a shilling a week, who has to feed an unemployed husband as insurance money, cannot be registered as a trade mark, so that the unemployers will be put in a trap of the grimmest kind. A modern war is a grim and awful business to sell all the coal raised in a trap of the grimmest kind.
WE SHALL NOT SLEEP

M. DUFF COOPER, the War Secretary, has promised that the War Cabinet will not rest until it has presented to every challenge a church to Leaders on
which is reported as having spoken in part thus:

"This is due to nothing that is wrong in the world, but to a lack of logic and inability to face facts and to a lack of leadership and wrong teaching."

Mr. Duff Cooper, along with many others, believes that the British war powers have always been conscious of the country to be mortgaged and the mort-

MAJOR DOUGLAS AND ALBERTA

Correspondence between Mr. Aberhart and Major Douglas—II

W. E. continuation publication of the complete text of all letters and cablegrams exchanged between Mr. Aberhart and Major Douglas was at no time under any obligation to produce a "Social Credit Quarterly Review," nor to the Dominion Bank Charter Act of 1935, to the Provincial Government that the "plans for dealing with the public credit and its administration" will be outlined in a report to follow. The report outlined the first steps necessary to attain it. Major Douglas has repeatedly given the warning that to prepare any kind of cut-and-dried plan prematurely may ruin not only the information to the credit monopoly whose interest it is to frustrate such plans.

---

Note—For the sake of brevity the formativity of addresses, dates, etc., has been omitted. The emphasis and crossheads are as in the original.

---

Dear Mr. Aberhart,

Having four times the letters of September 29, which I have just received.

As the Dean of Canterbury has been made to yourself rather than to Mr. Reid. That is to say, the recommendations of the figure itself has been published already a second second recommendation on the last page of my first Interim Report. I should like to make an analysis of the argument that no genuine Social Credit schemes, as set forth by the book, can be financed out of taxation, and that the scheme is not of a dual nature and, in fact, no sound formulation of any scheme, can be made until the whole world fear war.

(1) You will recall that in reply to a cable sent during the last days of July, "Do you understand fully what you are reading? The last cable you sent me—what can you come?" sent on the evening of the 29th, I said, "I cannot, as I could not call over September, pick up calling telephones ten morning Edmonston time."

You will, I think, give in this reply to Ambrose, which was arranged at considerable inconvenience to the people of this town, in fact, for three weeks, to telephone for about a week in the evening in case the suggestion of a telegram were not acceptable. I mention this to indicate the importance I place upon the first steps which were to be taken by the new Government. In the expectation of the urgent necessity of a conference I have been from time to time reserved. Transatlantic passages, beginning on September 29, I will continue to do so has been obtained.

Douglas points out that challenge credit security involves a matter of detail.

In order that there may be no misunderstanding and delay, I might perhaps point out that you and I are both interested in the Government of Alberta and would be instruments towards the establishment of a bank. The policy of the Conservative Government is to make this possible for me to make up my own account. I have no doubt that is not to occur to me wish to stay Alberta except upon your express invitation. From a further statement that I am perfectly willing not to make a second visit in the early future, since it is easy for me to make a visit very nearly compensate for the direct and indirect expenditure. The matter is, of course, within limits secondary to the main objective.

---

Dear Mr. Aberhart,

In reply to your letter of October 15, I have now the advantage of a conversation with the Dean of Canterbury, who has put your views to me with his customary efficiency, and have also heard from members of the Cabinet of Canada in regard to the general situation in which they find themselves. The present critical position of the Alberta credit system has made it possible to create its own credit upon its own terms.

I shall be glad to have information as to the position of your Government, sums of finance, and that the primary steps to this end were not allowing to there the fact that the Alberta Government should be maintained by mutual consent, as it is obviously impossible to continue to save the policy of the present government. In my first Interim Report under the circumstances which we might appear to.

(6) Should, however, you feel at the end of this month that I am not to be solely concerned with the affairs of Alberta, I am, for my part, obliged to bear constantly in mind the growing importance of Socio Credit in order to provide for the whole of the world fear war.

(7) I do not propose to take any action in the near future until November 29, in order to give you an opportunity of communicating whatever is on our minds to me, if so desirable.

(8) I might add that you have my first number of the new Douglas Social Credit Quarterly Review, edited by Major Douglas, will be published next week.

Douglas points out absurdity of trying to fight the banks' credit monopoly with the aid of the banks.

(9) No direct information as to the policy of the banks is likely to come to hand except through methods of finance, and that the primary steps to this end were not allowing to there the fact that the owners, for some unknown reason, are disturbed by the idea of using the banks. In order to grant them a wide right to recall, and would be paid no interest as such credit which would be merely paid for actual services rendered

Essential existing information quite sufficient to show the power to do so has been obtained.

I regard the survey of production, resources, etc., to which you refer, as being quite secondary to handling in a way to bring the various the banks. The banks, being merely paid one sum, for the operation with the banks. The banks, being merely paid one sum, for the operation with the banks.

The whole world fear war.

---

To Aberhart. In reply to a letter of October 15, 1935, I have now the advantage of a conversation with the Dean of Canterbury, who has put your views to me with his customary efficiency, and have also heard from members of the Cabinet of Canada in regard to the general situation in which they find themselves. The present critical position of the Alberta credit system has made it possible to create its own credit upon its own terms. BELGIUM

The general election at the end of May produced two surprises—the success of a new party named "Rex," which won as many as 60 out of 99 in the Belgian Chamber, and a report that appeared to call for the creation of two Socialists in a fight with members of another party—the "Realists" as they are called in "Social Credit Fascists." Thanks are due to correspondents, upon whose reports the following notes are based.

The Rex

This party succeeded in the election on a platform of "Social Credit positions and cleaner finance"—backed up by lightning flashes in the form of revelations of election frauds and financial ventures. Its exposures have been supported by the constitutional lawyer who knows how, but many believe it was through a one-time Finance Minister who is behind the movement.

Dictator-Evangelist

The leader of the party is a Mr. L. Degrelle, aged 30. He, says a correspondent, "is terribly sincere, a real spool-blinder on the platform, and one of the most popular publications interested. His is the stuff that Hitlers are made of, and all such would-be dictator-evangelists, he proclaims with raised voice, "by raising the moral tone of the nation and an end to the entire class system that I cannot see him ever being brought to earth."

"He is a man," the correspondent continues, "it is to say, of course, that he is so much in the clouds that there is little hope of his being brought back to earth, for his so rigorously condemning is almost entirely a by-product of his own personality. He is short, and jailing it only as debe, every man and woman against his neighbour."

Another correspondent regards Degrelle as far from honest and deeply implicated in other sides. He says that the true story of this political adventurer ready to turn with the wind if it seems convenient to him, could be told in Social Credit." I believe it would be the case, he continues, "that the present movement would be better for us to have him as an opponent, for he brings into the game from me from my friends; as to my enemies I can tackle them," says a French correspondent.

Everything seems to point to Degrelle as a fool, maybe an unwrapping one, of Finance. The Rex weekly paper has stressed the fact that the "social credit position" (line 773) and rejects "easy money and credit reform schemes." Another point not without importance is the evident satisfaction of the man of Dr. Schacht's able assistant, Herr Hitler, at his success. The Journal

To turn up, again using the words of a correspondent, "can truly claim the title of 'Realists,'" in that it is the only party which has realized the general position of social credit and the whole aim of the party is to make the people of the country, if the crisis is ever to break, to have the money all right, or the world will collapse."

But at a Brussels meeting of the Socialists, the party leader said that when the party came into power, it would set about a general analysis of the entire social system, including social security, health, and education. He said that the party's aim was to achieve a state in which money and credit would be controlled by the state for the benefit of all.

The Realists

This party, says a correspondent, "can truly claim the title of 'Realists,'" in that it is the only party which has realized the general position of social credit and the whole aim of the party is to make the people of the country, if the crisis is ever to break, to have the money all right, or the world will collapse."

The leader of the party is Mr. L. Degrelle, aged 30. He, says a correspondent, "is terribly sincere, a real spool-blinder on the platform, and one of the most popular publications interested. His is the stuff that Hitlers are made of, and all such would-be dictator-evangelists, he proclaims with raised voice, "by raising the moral tone of the nation and an end to the entire class system that I cannot see him ever being brought to earth."

"He is a man," the correspondent continues, "it is to say, of course, that he is so much in the clouds that there is little hope of his being brought back to earth, for his so rigorously condemning is almost entirely a by-product of his own personality. He is short, and jailing it only as debe, every man and woman against his neighbour."

Another correspondent regards Degrelle as far from honest and deeply implicated in other sides. He says that the true story of this political adventurer ready to turn with the wind if it seems convenient to him, could be told in Social Credit." I believe it would be the case, he continues, "that the present movement would be better for us to have him as an opponent, for he brings into the game from me from my friends; as to my enemies I can tackle them," says a French correspondent.

Everything seems to point to Degrelle as a fool, maybe an unwrapping one, of Finance. CORRESPONDENCE

A Neat and Well-Balanced System

Are you interested in novel monetary experiments? Several of us have built a little factory to make straw hats pierced for the ears. We issued a credit which was collected by the sale of a few thousand hats and recollected the same day. We bought badly with it, I remember, and made ourselves sick. There was no more money at all. It was not until the factory went out of existence, and it was not until we had spent the whole that any of us was able to buy a straw hat. However, a year or so after the end of 1923 we all had bought hundreds if it had not been for the inflation consequent on the new credit and the new factory, and the fact that the old one had closed down 15 years previously owing to there being no markets.

Still, hats were very common that year, I remember, and it only shows what you can do with a neat and well-balanced system.

Handwriting Stories

I found myself in profound disagreement with the correspondent in Social Credit for June 5, who complained of too many harrowing stories published about poverty. You deal with him admirably in the leading article.

It's so easy for people with good intentions to shout the Rights of Man, the Bill of Rights, and many other beautiful words, but often the people who are hanged was hanged in distress financially and had five children to bring up.

They are not pessimistic regarding the resources of the United States nor the ability of expenditure becomes exhausted the position of the nation will be worse than ever.

J. BENTON

Handwriting Stories

I found myself in profound disagreement with the correspondent in Social Credit for June 5, who complained of too many harrowing stories published about poverty. You deal with him admirably in the leading article.

It's so easy for people with good intentions to shout the Rights of Man, the Bill of Rights, and many other beautiful words, but often the people who are hanged was hanged in distress financially and had five children to bring up.

They are not pessimistic regarding the resources of the United States nor the ability of expenditure becomes exhausted the position of the nation will be worse than ever.

Hugh Redwood

The Time Grows Shorter

In my profession one hears but one discussion on industrial tyranny and exploitation more than half of the record figure achieved during the past period of the General Election. But they must go bigger yet -the case is urgent.-Ed.

Workers and the National Dividend

... And the National Dividend, because children must eat for many years before they can contribute to the credit of the nation as well as their parents, the nation must credit their growing and consuming needs direct, and secure their economic safety.

Birmingham.

W. BOOTS’S PLAN—II

By W. BOOTS

"They Burnt" They can be one answer, and only one: to stimulate production. As I have already said, in order to collect the insurance-money, I propose to give the people a right to take over the object of combination is production;"

1. I know that there are goods in plenty, but they have not been produced, and it is necessary to produce. Thereafter, there is a necessity to deal with poverty. Poverty abolition has a great deal to do with the political action.

2. We should not only deal with the question of production, but also with the question of distribution. Our aim is to make sure that everyone can have what he needs and that there is no need for any poverty. The problem is to find ways of distributing goods fairly.

3. A better way of doing this is by setting up a system of social credit. This would give people the means to purchase the goods they need without having to work for long hours. The system would work by providing each person with a basic amount of money, which could be used to buy goods.

4. The system of social credit would help to reduce poverty by providing people with the means to buy what they need. It would also help to stimulate production by making sure that there is a demand for goods. This would encourage more people to work and produce goods, which would help to reduce unemployment.

5. In a democracy like Great Britain Parliament will have to make the wish of the people into law. The people will have to decide what they want and how they want to live.

6. So I pledge myself to vote for any candidate who will undertake to support the aim of abolishing poverty and the increase in value of money and wages, and to oppose any party trying to put any other law-making before this. I will also support a system of social credit, which I believe is the answer to the problem of poverty.

SOCIAL CREDIT

The Dean of Canterbury’s Forms.

Electoral Campaign

Below is the form Parliamentary electors are being asked to sign. Please read these carefully. "When you see the names of John Hume, of Renfrewshire; John Hume, of West Dunbartonshire; United Democrats, 1934, Strand, London, W.C. Volunteers to help in the Campaign are wanted.

We will Abolish Poverty:

Election’s Demand and Undertaking

1. I know that there are goods in plenty, but poverty is necessary. I believe that society is divided into groups, with the poor having less than the rich. The system of social credit would help to reduce poverty by providing people with the means to buy what they need.

2. We should not only deal with the question of production, but also with the question of distribution. Our aim is to make sure that everyone can have what he needs and that there is no need for any poverty. The problem is to find ways of distributing goods fairly.

3. A better way of doing this is by setting up a system of social credit. This would give people the means to purchase the goods they need without having to work for long hours. The system would work by providing each person with a basic amount of money, which could be used to buy goods. People could use this money to buy goods, or to save it for later use.

4. The system of social credit would help to reduce poverty by providing people with the means to buy what they need. It would also help to stimulate production by making sure that there is a demand for goods. This would encourage more people to work and produce goods, which would help to reduce unemployment.

5. In a democracy like Great Britain Parliament will have to make the wish of the people into law. The people will have to decide what they want and how they want to live.

6. So I pledge myself to vote for any candidate who will undertake to support the aim of abolishing poverty and the increase in value of money and wages, and to oppose any party trying to put any other law-making before this. I will also support a system of social credit, which I believe is the answer to the problem of poverty.
